

THE INFOTRIX MATRIX: CHAPTER 1

Introduction

Born and raised in Italy, I moved to the UK around 8-9 years ago for personal and professional reasons.

Shortly after I moved to a small town near London, the Covid 19 pandemic broke out.

"Coincidence" has it that the **first province in the world outside China to be affected by the Covid 19 pandemic** was precisely the **home province of the "Prophet" presented in the book "The Egotrix Matrix,"** whose archetypal combination is Capricorn, Ascendant Aquarius, Descendant Leo.

In fact, it is well known that during the Covid 19 pandemic through 2020-21, there were more deaths in Bergamo Province than in New York City (about **17,000**).

What is only known to a few thousand people, however, is that during the Covid 19 pandemic, **the most important acquisition of the postwar period took place in Bergamo,** namely the acquisition of UBI Banca by Intesa San Paolo.

I still remember the words of the previous CEO of UBI Banca in the shareholders' meeting when he explained to the shareholders, "***Would you ever sell your house at half the price?***" or something like that.

It seems to me that the transaction had been completed **for 4.5 billion** (with an initial offer of **3.5 billion**, but according to experts the bank was worth **at least 7.5 billion**)

The point is that, at that time, Bergamasque shareholders heard and thought only **of Ambulance sirens.**

It may just be a coincidence, but it is good to remember the words of a well-known Italian politician, Giulio Andreotti, when he said, "***to think wrong is a sin, but many times one is right.***"

As "chance would have it," this is also the home province of the **Engineer Marco Todeschini.** He was the one who discovered how to verify and measure the existence of **Ether,** the **Fifth element of the Vedas.** Vedas are Sanskrit texts from 2-3000 BCE and form the basis of our zodiacal knowledge. However, for unknown reasons, at some point in our history reference to Ether vanished into thin air (indeed it is an invisible liquid).

Todeschini, in the 1970s, was supposed to win the Nobel Prize for his work but for other unspecified reasons was never awarded it.

Yet **Todeschini's formulas were/are very clear and unambiguous**, conceptually revolutionary for the period, not least because they consisted of a masterful combination of knowledge brought by a multitude of 20th century scientists.

Going back to our time and precisely to the end of the Covid 2019 pandemic, that is, in 2023; on the other side of the world another very ambiguous episode occurred. I am talking about the so-called "**Maui Fire**" in Hawaii.

The well-known magazine "Vice" expressed it this way:

*"While the claims about the government's attempt to create a smart island or turn fire-ravaged city of Lahaina into a 15-minute city are **new, the idea that government-developed laser weapon systems were used to ignite the fires is not new, dating back at least to the devastating wildfires that raged in California in October 2017.**"*

*"These claims blend two distinct conspiracy narratives: **a deep distrust of governments and claims that downplay the role of climate change in the dramatic increase in the number of wildfires that have raged in North America in recent years.**"*

*"The fires on Maui began on **Aug. 8** and **have** so far claimed the lives of **99 people**, with **another 1,300 still unaccounted for**, making this **the deadliest fire in the United States in a century**. Authorities are still investigating the cause of the fires, but so far there is no evidence that they were started deliberately. "*

Illustration 1: Maui Fire August 2023 - Photo Credit: Vice.com

I am not fire expert but after watching several videos and listening to several expert testimonies I can make myself available to **testify in an intergalactic court of law** in favor of the hypothesis that some alien individual had a hand in it. I have seen **laser beams descending vertically on houses and "Illustration 1" itself proves that this cannot be a fire.**

Someone, equipped with **flying saucers and lasers**, razed an American town.

It was August 2023, a few months later I was contacted by a representative of large technology companies for potential collaboration opportunities.

Upon my withdrawal from this possible collaboration unspecified individuals began insulting me, violating my privacy and that of the people I love.

Some might ask, *"How can they violate your privacy, your intimacy, if all you would have to do is go to the police and report "unknown persons" for stalking, so that the situation is monitored, and any wrongdoers brought to justice?"*

Because the person who attacked me is the IP provider of the planet, is the leading technology provider of the planet and within two to three hours it **can become the police**, it can become **your girlfriend**, it can become **your mother, father or brother**. It can also become **you** (unless you have the vortex). Just like in the movie Matrix. *How?*

Whenever you buy **an electronic device**, such as a phone, a computer, a laptop but also a television or even home appliances you are often required to register with an online account. When in the source code of the landing page you find something similar to this code:

"U8x1XuCAJPYAHZrD5wpAZY48UNuABQm8H2W5ZSHf54Cx51YrYGEpSUHzmhwApX0cuYX4SrG4VJ-yjxZzPbsQyUWh7I2YM9dQSBi7qULC" it is possible or probable that that address is also a footprint in space-time.

That is, something that certifies that **you were in a specific place at an equally specific time** (you don't have to count/look at the letters of the code--I mean fairly complex codes like the one shown in the lines above).

You can also find these codes when you register for a phone app or when you download a phone app.

This allows those who live or know how to use this dimension (space-time), i.e., the sixth continuum identified in the Sepher Yetzirah, to **implant active/passive chips/memories or whatever in your brain** and potentially take **control of your body** you live your life just as you are, even without you or your original consciousness noticing.

I do not exclude that this little game can be done with any kind of commercially available electronic toy or puppet (by inserting special **nano-chips into toys**).

In this period, I was also noticing **very particular suicides** related to technology/internet and very well-known Social Media personalities, the famous Influencers (Youtuber, Tik Toker, ..) but also of promising sporting talent. Let's see what Wikipedia says:

https://en.wikipedia.org/wiki/Social_media_and_suicide

*"**Suicide** is one of the leading causes of death worldwide and, as of 2020, the second leading cause of death in the United States for people ages 15-34. According to the Center for Disease Control and Prevention, suicide was the third leading cause of death among adolescents in the United States from 1999 to 2006.*

*In 2020, the **suicide rate in the United States** was 13.5 per 100,000. Suicide was one of the leading causes of death in the United States, with 48,183 deaths in 2021. Suicide rates increased by 30% from 2000 to 2018 and decreased in 2019 and 2020." - Wiki*

*There is substantial evidence that **the Internet and social media** can influence suicide-related behaviors. Such evidence includes **increased exposure to graphic content**. Research conducted by Sameer Hinduja and Justin Patchin found a correlation between cyberbullying and suicide. According to their findings, cyberbullying increases suicidal thoughts by 14.5 percent and suicide attempts by 8.7 percent. Particularly alarming is the fact that children and youth under the age of 25 who are victims of cyberbullying are more than twice as likely to engage in self-harm and suicidal behavior. Overall, teen suicide rates have increased over the past decade, which is a significant public health concern, with more than 40,000 suicides in the United States and nearly one million worldwide each year. - Wiki*

Some examples:

- **Kubra Aykut, the 26-year-old Turkish influencer who married herself, dies by suicide.** Read more: <https://www.deccanherald.com/world/kubra-aykut-the-26-year-old-turkish-influencer-who-married-herself-dies-by-suicide-3213002>
- **Eva Evans, New York influencer, died by suicide at the age of 29.** <https://www.independent.co.uk/life-style/eva-evans-nyc-tiktok-cause-of-death-b2533732.html>
- **A 19-year-old social media influencer from Chhattisgarh died suicide while live-streaming on Instagram.** <https://www.hindustantimes.com/india-news/influencer-19-dies-by-suicide-on-instagram-live-in-chhattisgarh-followers-make-attempts-to-save-her-101735888311033.html>
- **Simran Singh, a well-known radio broadcaster in Jammu and Kashmir, was found dead in her rented apartment in Gurugram. She had a large following on Instagram.** <https://timesofindia.indiatimes.com/etimes/trending/who-was-simran-singh-the-instagram-who-died-by-suicide/articleshow/116701924.cms>
- **Chinese influencer, 24, dies the day after revealing she had not eaten for 2 days and could not pay rent.** - Tragic cosplay blogger tells army of fans she was "on the brink of death" before dying, family leaves online accounts open for mourning. <https://www.scmp.com/news/people-culture/china-personalities/article/3301025/china-influencer-24-dies-day-after-revealing-not-eating-2-days-unable-pay-rent>
- **Fitness influencer Chris O'Donnell, popularly known as Creeohdee, has died at the age of 31.** According to an online obituary, O'Donnell died Saturday, Jan. 11. The Maricopa medical examiner told People that the social media personality died from a gunshot wound to the head. His death was ruled a suicide. <https://www.hindustantimes.com/world-news/us-news/fitness-influencer-chris-o-donnell-dies-by-suicide-at-31-had-a-background-in-mental-health-and-substance-abuse-101737124469841.html>

- **Did TikTok videos inspire teen's suicide? Mother says she found graphic evidence.**

<https://www.nbcnews.com/tech/social-media/tiktok-suicide-videos-lawsuit-social-media-self-harm-rcna146680>

- **One year ago Julia Ituma's tragic passing: how much her talent is missed.**

<https://www.milanoToday.it/sport/volley/un-anno-fa-tragica-scomparsa-julia-ituma.html>

© MilanoToday

"It has been exactly one year since Julia Ituma passed away. The Milanese volleyball player, a great promise of Italian volleyball, passed away at just 18 years old on the night of April 12-13, 2023, in Istanbul to be precise."

"making the story even more shocking were video surveillance images that showed Ituma walking in the hotel corridor and then crouching down while checking her phone shortly before the extreme gesture." -© MilanoToday

- **The husband of a New York influencer explained the reasons for his suicide in a heartbreaking suicide note.**

"Real estate mogul Brandon Miller took his own life in the \$155 million Hamptons home he shared with his wife Candice last month amid mounting financial difficulties. In a farewell letter, Miller explained that last-minute business had fallen through, leaving him with no way out."

<https://www.thedailybeast.com/obsessed/new-twist-in-instagram-mama-and-tatas-husbands-suicide/>

<https://www.dailymail.co.uk/news/article-13746713/real-estate-brandon-miller-suicide-note-hamptons.html>

Anyway, for a person like me, who worked in **digital marketing**, life became hell. Also because, before I walked away from that potential deal with those big tech companies, things were not like that.

When you were searching for something, logging into an online service or registering for a streaming service, even looking at the source code of a URL/link (instead of left-clicking the link, you right-click and select the "look/copy source code" option and paste it into "notepad" or

web browser) you would find the same name that gave the title to the page, (examplesite.com/example-page). Instead after surviving the first wave of attacks, the digital world turned into the "**tracking digital**" world where often long codes were hidden in the source code (which **were certainly not comparable to the usual tracking codes** for traffic analysis).

In 2023-24 **Artificial Intelligence** came on the scene, and after a few months a number of **erotic sites**, still active today, sprang up that offered and offer **explicit videos of very famous people**, even **without their consent**; in particular, I am talking about **famous actresses**, singers, and even **people of royalty** who often reach the **forbidden dreams** of many fans. I am talking about the famous "**Deepfake**" videos.

This was the time when I was attacked commercially and in response I thought of an **alternative, less technology/internet dependent business**, namely *mattotrix.fun* -- so I tried to figure out how these "*deepfakes*" (one of my packages) worked.

Right from the start I understood that to create deepfakes of excellent quality like the ones I was seeing on certain erotic sites was not a trivial matter.

And since some of these sites also used "links" with particular codes in the source code I soon associated these kinds of technologies with some **alien**, whether these reptilians or others.

In fact, **erotic sites are excellent catalysts for "human beings"** who can, unbeknownst to them, become energy or functional bodies for third-party "alien" subjects.

various contexts, such as personal relationships, work or public settings, and is often associated with power and control dynamics. - AI 2025

People who reached, even deservedly, **the pinnacle of success or social status**, and thus might feel more protected, were instead the main target of these kinds of erotic creations.

I am saying that there are aliens, often Reptilians, **working behind the scenes** to steer the conscious state of the system in one direction rather than another, going beyond what is commonly understood as the "**social status**" of those involved or the **idea of power in the sense of accumulated capital**.

The Covid, the UBI, Maui, **digital transformation**, the web becoming a network of potential **space-time footprints**, an economy increasingly dependent on **online channels** and social media, **Artificial Intelligence**, deepfakes, the meeting of the Serpent and the Prophet.

*Could it be that the events listed in this introduction, like many other events of which I am unaware, are all linked by a **single thread**?*

*Could it be that **new awareness** is about to be injected into the Kingdom (The Land) and some worried Asuras have taken care to create their own **guarantee fund** in anticipation of this renewal?*

Any event, especially large ones such as those listed above, can have a multitude of motivations behind them and a multitude of goals to be tested or achieved.

During Covid we saw how by polluting less **the animals returned to repopulate certain areas**. Those who created that situation were able to **test the coordination of the various national health systems** as well as the **subjugation of the population to particularly rigid** and sometimes irrational **rules** as coercive.

During the **UBI transaction**, some **entrepreneur/banker may have rubbed his hands** thinking he got a great deal but may instead be an unwitting victim of some Asura who is **quietly conquering everything as his controller**, with a view to the "**shared economy**" of the "Vision of Harmony of Things" up until now feared by the "**apparent biggies**" of the planet.

Indeed, it is important to remember that certain aliens, although they use possessive and coercive methods, are not interested in capitalist logic (which, for thousands of human beings, is now nothing more than an obsolete construct).

Regarding **Maui**, there have been several journalists who have shown **construction contracts** signed by **construction companies** before the fires occurred. Unbeknown to the contractors themselves, there may have been some Asuras as well as some Reptilians behind this operation, perhaps interested in carving out a little corner where they exploit chipped humans through **"footprints in space-time."**

As I mentioned in previous work, **some aliens**, including certainly some Reptilians, basically some of the Gods of the past, may have become very aggressive due to the use of improper energy supply (the Pyramids method described by Corrado Malanga); clearly these are my speculations at the moment and I am certainly not making this a species argument.

Instead, given my experience, I can make a case for the amplification of negative feelings, which include fear, envy, and anger that have led some of these aliens to monopolize online (and to some extent print) information.

In fact, over the past couple of years I have unfortunately experienced **the mystification of the authors and information sources** I have used for my research as well as **the manipulation of my emotions through personal relationships**. Imagine extended periods of silence from people close to you that you would normally converse with on a daily basis, the same people taking up strange rituals or suddenly starting to insult and mock you. These actions combine to make you feel isolated, humiliated and very lonely.

In 2024 they had in fact **tracked my Broadband** and these soldiers or AI, had seen the sites I visited almost daily to inform me about what was going on in the world.

The sites were **byoblu.com**, **imolaoggi.it**, **luogocomune.net** and the YouTube channel of **Red Ronnie**, a well-known Italian music expert and world observer.

Red Ronnie, during **Covid 2019** had raised many questions about the ways in which the Vaccines had been administered to the population and, if I am not mistaken, had also pointed out the presence of **NATO Planes** near the sites of the floods in Emilia Romagna before the events that cost the Romagna community several setbacks. Red had also dusted off a RAI video from some 20 years ago showing **"the machine for creating earthquakes."**

So we are talking about a **particular observer**, one who asks questions and does not take all things for granted.

I also realized that I was being tracked because of Red Ronnie's channel.

One day, after Red went to see a famous Italian influencer, where they also talked about a well-known "**virtual reality**" **social**, Red Ronnie returned to his channel and started talking about this virtual reality social A 'totally unusual topic on his part and not in line with his daily or historical arguments (music, alternative cures, peace, love, solidarity).

It could be seen from the comments on that video and afterwards that several of his followers had noticed this partial "out of tune" (social VR platforms topic).

I remember him, in regard to this, simply saying that he "could evaluate anything or any product" without having to justify himself (rightly so, I say). But, from that moment, **I understood that he had been abducted.**

The abductee does not understand the difference between his or her thinking and that induced by the chip or chip+active memory or spirit (which seem to have the ability to intervene at the right time in the discussion to obviate awkward questions).

Incredibly, shortly thereafter, I saw a video where **Corrado Malanga said that Red Ronnie was now in the abduction problem.**

Further confirmation came a few months later, where, at a time when I was visiting the "**Vintage**" **category of some of the erotic sites**, the word "**Vintage**" appeared in the title of some of his videos, often even without logical meaning (it had been altered to make me feel watched).

Even for Mazzucco, editor of **luogocomune.net**, I saw a slight restyling of the CMS and **some of his post titles that traced the topics I was writing about at the time.**

One of the roles of demons is just that.

Toying with the prophet's mind with these mind games (which one cannot tell if he is going crazy or if it is simply an endless series of coincidences).

On the other hand, as far as **imolaoggi.it** is concerned, I cannot say whether the editor Armando Manocchia was abducted but certainly among the news provider sites he collaborates with, there are abducted sites. This is because even some of the **news posted from his site traced my chronology** or reflections of the period. Moreover, I am convinced that behind **the separation between Byoblu and imolaoggi, which collaborated well until the tracking of my broadband**, there is the hand of the demons that haunt me. Most likely

someone on the Byoblu team (certainly Messoria) has been abducted. Even some of their posts often traced my chronology, and listening to Manocchia's video about the quarrel with Byoblu I noticed that Armando was putting the point **on the egoic knot of the quarrel**. That is, he was making it clear that Messoria (Creator/Director of Byoblu) had an attitude of "***I am I and you are not shit***" cit. Totò (well-known Italian actor), typical of the abductee when he has an altered subconscious.

All people connected to these sites should **scan themselves with a sufficiently powerful EMP** to disable any chips because it is very likely that they have been chipped and have thoughts that are not theirs without them noticing (especially if they have active/passive memories attached).

In case, as they are harbouring a "**hungry spirit**," they should create a small group of people and channel their mantras/prayers to get rid of the spirit momentarily so that they can assure themselves that certain choices are due to their consciousness and not that of the demon/spirit (whose moves toward Knowledge i.e., toward Separation and enjoy play tricks).

I am describing the same **period** I also talked about in the introduction of the first book "***The Egotrix Matrix***" but, as you see, I provided **very different information**.

However, if you have read the book "The Egotrix Matrix" you might catch a glimpse of something other than just a list of news items. Namely:

- **Someone who needs to be smart or be the smartest** (Venus stealing the spotlight from the Sun) - (UBI transaction)
- **Someone with the Vice of Cowardice** (Daath) and **Destruction** (Mars) – (Maui fires)
- Someone with the **Vice Lust and Abused Love** (Venus) - (Deepfakes)
- It is very unlikely that you will have to read newspapers fearing the hypotheses presented here (but already considered by others), then you can also see the **vice of falsehood** in it (Mercury vice)

- **The Prophet who needs Light** and tries to show what he sees to those who have politely asked for his opinion. (Aware that there are many people who have already pointed out certain anomalies; but as mentioned above, given that we live in a militarized conscientious system, if there is any hope for hearing even these versions of the facts, that hope is the Prophet, who in the now decaying "system of conscientious control," is tasked with bringing light.

If you had read the first book in this series "*The Matrix Legacy*" with, **the Egotrix Matrix**, you should remember the famous triangles Sura, Deva, Asura i.e. the three triangles Superior, Ethical and Astral:

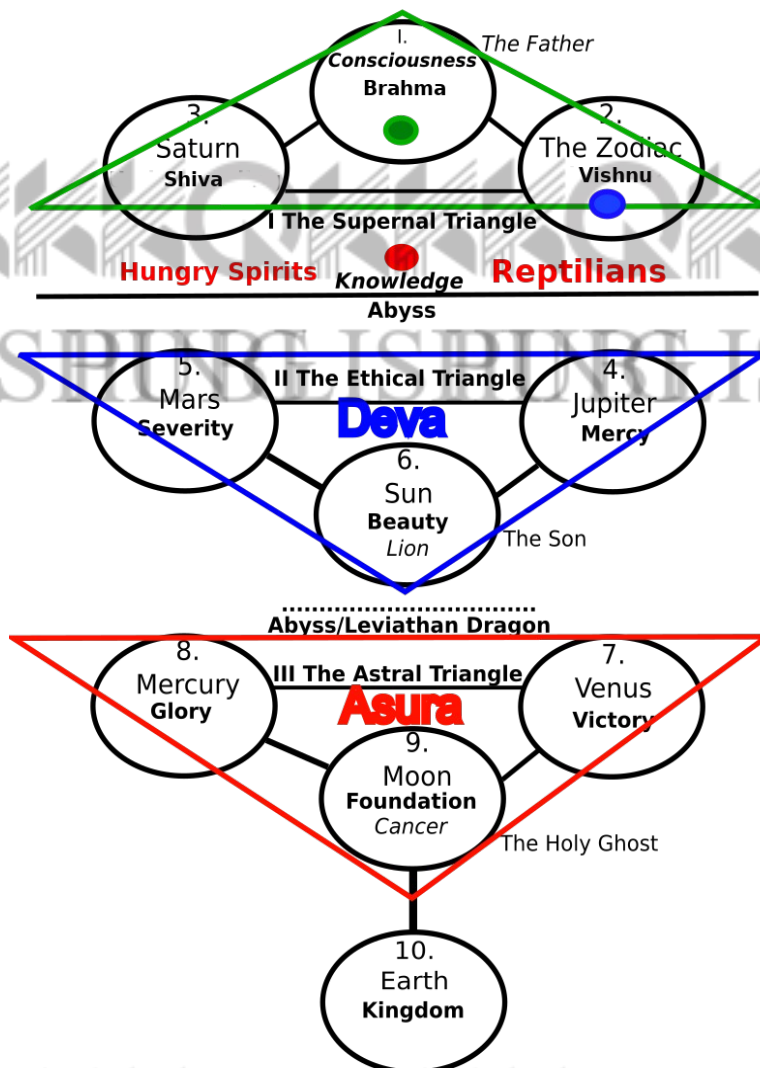

Illustration 2: The Three Triangles and the Three Creator Groups.

If you have read the book or know these systems of thought you should also remember that Jewish Qabalah, like astrology, associates specific Zodiac archetypes (the famous zodiac signs) with each planet. In particular, the Mystical Qabalah of Dion Fortune (British Esotericist of the 1900s) associates specific vices with each planet. Keeping these vices and my astronomical analysis in mind I can **roughly** say:

At "**time t**" if you were a Deva you might perceive the events listed above as an "**extreme possibility**" (Cruelty and Destruction are the vices of Mars) but also as "**absolute evil.**"

At "**time t**" if you were an Asura you might perceive the events listed above as a "**necessity**" or a "**possibility**" (these archetypes tend more toward possessiveness, jealousy, envy, and unethicity).

At "**time t**" if you were a Superior you might perceive the events listed above as an "**avoidable possibility.**"

The fact is that at "**time t**" each of us can only be one of three things, depending on the state of our awareness and our psycho-physical conformation at "**time t.**"

This consideration of mine can be extracted from both **the time course of the Ego** as seen with Chinese medicine (Joan Duveen) and the **community course of the Ego** as seen with Behari.

Very succinctly and crudely one could also say that in adolescence one is Asura, in Maturity one is Deva while in Seniority one is Superior. But this could still be understood by single event or class of events. In any case, I will elaborate on this later.

So we come to 2025 and this book: "**The Infotrix Matrix: The Universe is a Living Information System**" - Volume A.

Each moment, **time t**, observed from a **different angle** can provide different, even **conflicting** information than previously observed.

Each element or event, observed with a **different awareness**, may provide **different**, even **conflicting information** than previously observed.

But as Professor Corrado Malanga says, citing the **second principle of thermodynamics** awareness is a measure of Entropy, and Entropy always increases.

*"In the **first law of thermodynamics**, it is stated that in any transformation energy is neither created nor destroyed.*

*The **second law of thermodynamics** states that every spontaneous process is overall accompanied by an **increase in entropy**." -*

<https://www.edutecnica.it/chimica/entropia/entropia.htm>

***Entropy** is a concept derived from thermodynamics and refers to the **measure of disorder or randomness** in a system. In more technical terms, it represents the amount of energy in a system that is not available to do work. Entropy increases in a closed system over time, according to the second principle of thermodynamics, indicating that **natural processes tend toward a state of greater disorder**. This concept is also applied in other fields such as information where entropy measures the uncertainty associated with a data source. - AI 2025*

I have underlined in red those sentences that according to some scientists, including Professor Corrado Malanga, would have an opposite or at least different **meaning** (they remind me of the AI error on Metatron's cube, where the AI pointed to 11 circles instead of 13; today I note that some AIs have corrected the error).

Anyway, mistake or not, in this video, available on Youtube (<https://www.youtube.com/watch?v=o6TiSB792ds>), Corrado Malanga makes it clear how **entropy proceeds toward symmetry, order and union**. In particular he wrote a book where he talks about **money**. Here are his words:

*"There is a chapter that talks about money. It talks **about the society of the future world**.*

*About **the happy world**, how we actually should live this thing.*

Here, money -- who invented money? money was invented by the rich. This already throws a wrench in the works, point number one.

Why did the rich invent money? To make more money.

*The problem with money is that when you make money you have to remember that **the universe is entropically an isolated system** i.e., **you don't get out of the Universe**.*

***The Universe is isolated in the sense that it does not exchange energy and matter**. What does this mean? It means that the amount of money is always the same, it may turn but it is always the same.*

What does this mean?

*It means that if **there is someone who becomes rich you are dissymmeting reality** because there are poor people on one side, rich people on the other side.*

So is no longer that plane of symmetry that would give everyone the same amount of stuff.

This means that making money is entropically wrong and in any case such a choice is punished by entropy.

The second principle of thermodynamics says entropy always increases so in the Universe, it increases all that is symmetry.

Instead, anything that dissimulates, even in the economy, will not work, will not move forward, and the more you try to make the more money then you always get a hallucinatory blow that you and your whole generation get wiped off the face of the earth for thousands of years." - Corrado Malanga

So, there may be contrasts such as egoic conflicts or different perspectives at "time t," but the more we continue on our path, the more we will tend toward union. In "The Egotrix Matrix" I had said that **Knowledge/Daath** goes toward **separation** while Kether, **Consciousness**, goes toward **union** (considering the Tree of Life glyph of the Sepher Yetzirah, Qabalah)

6 Dimensional Continuums

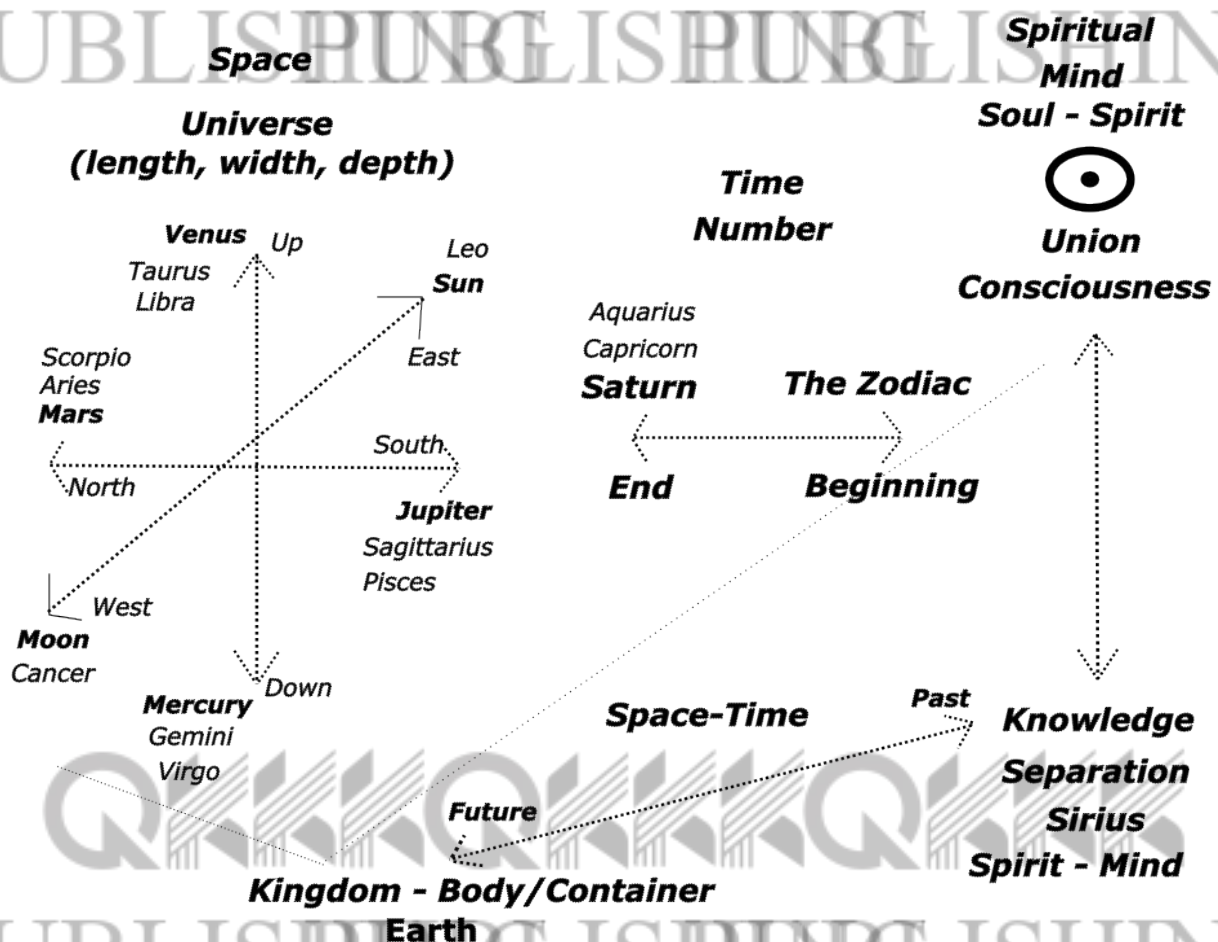

Illustration 3: The 6 Dimensional Continuums Extracted from the Sepher Yetzirah

Union refers to the act of joining or bringing together two or more elements to form a whole. It can have different meanings depending on the context: **in the social sphere** union can represent **cooperation and solidarity** between people; in the political sphere, it can indicate the integration of states or nations; in the family sphere, it refers to the bond between individuals, as in marriage. In general, **union implies a sense of cohesion and sharing.** - AI 2025

Now, in this informational context, I return to my experience.

In March 2025 by doing voice tests, **saying provocative things my potential listeners**, I guessed from their reactions that someone was listening to me; that is, **I realize that I have been chipped**. At the moment I have no evidence of anyone using my body without my knowledge but I noticed these chip functionalities (which I am sure exist somewhere in my brain):

- Those who monitor me, soldiers or AI, **see and hear whatever I do or say**.
- They can also **read my thoughts** either totally or partially (depending on the mess in my head) and **draw inspiration from my ideas**.
- This thing may have happened about **8 months ago**, a night when my partner and I woke up and some things in the bedroom had fallen off the dresser or while I was watching a movie on a **very popular streaming platform** with my partner's laptop.
- **I have never bled from the sphenoid in the past few years**, so it means that Reptilians & co can safely heal the wound at the surgical stage without raising any suspicions of the potential abductee.
- I don't think I have any active memory or anything really compromising, I think instead **it is an AI connected to other AIs present in other subjects** or something like that, which generate electro-magnetic signals/pulses with particular messages in order to make me feel observed or to communicate something to me.
- I also believe **they can generate impulses to make me look at some sites/videos rather than others or potentially to visit one physical place or another**.

- I also **do not feel possessed by a spirit** because I believe that one of the functions of the vortex present in "prophets" is precisely to act as protection from any "**spiritual**" (subconscious) interference.

- In this regard, I am trying to **build an EMP powerful enough to disable the chip in my brain**. I think every human being should have one in their house and get a scan monthly or from time to time (paying more attention to the technology used and the objects one brings into the house).

Illustration 3: Example of an EMP potentially capable of destroying any technological chips or interference inside the body and especially in the brain. To be avoided for pacemaker users. - Photo Credit: Youtube Ceapa Cool - <https://www.youtube.com/watch?v=k-iSYwZwAOM>

That is why **I cannot guarantee that I am totally independent** in my writing but still I proceed, in my own way, to expound what I think is the very famous "**Vision of the Harmony of Things**." However, I can tell you that **for my way of thinking and ego needs**, being aware of this makes me feel constantly under torture. My "colleague," for example, doesn't give much of a damn (this is also consistent with the fact that I alone am swamped by **constant references to my thoughts**).

After what has been discussed in the book "The Egotrix Matrix" and what has been quoted in the preceding paragraphs as well as in the preface to this book, it becomes clear that the famous "**New World Order**" so much feared years ago in the media during the **2012 financial crisis**, another "**cinematic**" and "**premeditated**" situation, is not merely a **Terrestrial** issue but a **Universal issue**.

Precisely because it is now apparent that other species have taken an interest in planet Earth, and some these species are predatory in nature or even could be considered our **natural predators**. Just as the Lion might be for the Gazelle.

"Prey" means "victim" or "hunted," generally referring to an animal that is caught by a predator. In a broader context, it can also mean someone who is victimized by a dominant situation or person. - AI 2025

*A **predator** is an organism that feeds on other organisms, known as prey, to survive. In ecology, predators can be carnivorous animals that hunt and kill other animals or even organisms such as some insects or carnivorous plants that acquire nutrients through predatory processes. Predators play a crucial role in ecosystems, helping to maintain population balance of species and influencing environmental dynamics. - AI 2025*

The famous "**Vision of the Harmony of Things**", seen by the prophet described in the book "The Egotrix Matrix", finds its foundation in being able to recognise and relate to one's predators. Forged correctly, the relationship becomes very profitable for both the one who is the prey but also for the one who is "technically" the predator.

Similar to how the Gazelle could relate on equal terms with the Lion and bring him a piece of meat every day without having to suffer or lose functionality and in return the Lion would grant him protection from other predators as well as support for any need.

Clearly this implies **the ability to respect each** other on both sides according to one's "natural" role, so to speak.

The **Padma Purana** quotes:

*"There are **900,000 species** living in water. There are also 2,000,000 non-moving living entities (sthâvara) such as trees and plants. There are also 1,100,000 species of insects and reptiles and 1,000,000 species of birds. As for quadrupeds, there **are** 3,000,000 varieties and **400,000 humanoid species**."*

Among this multitude of species some are predatory and some are not. But as we saw in the first book of this mini-chain, no one chooses how they are. Even among human beings, at least from an archetypal point of view, **some are predatory and some are not**, some are possessive and some are conceited, some are rational and some are irrational. At "**time t**" someone can be predatory and at "**time t+1**" they can be prey and vice versa.

I cite, for example, a passage from the best-selling authors, I.B. Arya Lawa Manuaba & I Nyoman Sudirman, STKIP Suar Bangli, who, speaking of the Vedic texts, mention **very aggressive** species of **insects and arachnids** that thrive on planets with high oxygen levels:

*"Sarabha are the krimaya family, **in the form of insects and arachnids**. They thrive in optimal conditions on **a planet with a high level of oxygen**. The more oxygen they receive, the bigger and more intelligent they become. The Bhagavata Purana talks about the species ruru, which belongs to the krimaya. In the Bhagavata Purana it says that **ruru** do not exist on Earth, but **they are fiercer than a snake**."*

Thus, in the face of all the data presented so far, and considering that by **process of abiogenesis intelligence can develop in any living form depending on the abiotic factors of the planet of origin**, the question remains whether a planet should not tend to assume a threefold configuration consisting of prey, predator and overseer.

Exactly as derived from **the now obsolete "Kingdom Consciousness System."**

***Abiotic factors** are the **components of an ecosystem that have no life** (from the Greek bios, meaning life, with the prefix a-, without). Thus, they are the surrounding environment, except animals and plants (biotic components): light, earth (soil and subsoil), rocks, water, air, the totality of climatic factors etc – WIKI*

In nature, almost every living thing **results in both prey and predator**. However, it is also true that some predators have less predation or less chance of being preyed upon than others.

Humans can be preyed upon by some animals, but almost all animals can be preyed upon by humans.

Since we are now talking about the **Universe** and new information has surfaced to our minds, we know that there are other living beings present on Earth, some just as intelligent, or more so, than human beings and with more knowledge. They use that knowledge to feed themselves energetically, both from a biological and emotional point of view; as well as from an ethereal point of view. I am of course talking about **Reptilians** and **Hungry Spirits**.

At this point all that remains is to take up **Ego Matrix** and observe the alien species that seem to have contributed to the creation of the **personality matrix** described in the Egotrix Matrix. But in this case the observation will be informative in nature with an integrative function.

If in the previous paper we came to the conclusion that the problem of the Universe is "**time t**" because the living beings in it are **prisoners of their Ego**, in this paper I will try to understand how the Universe speaks for guidance on how to **respect, satisfy and prioritize** everyone's **Ego** at "**time t**."

Let us observe again the **contrast spiritual/mental plane with astral/material plane** of the Veda/Qabalah and compare it with what is contained in the Puranas and Qabalah.

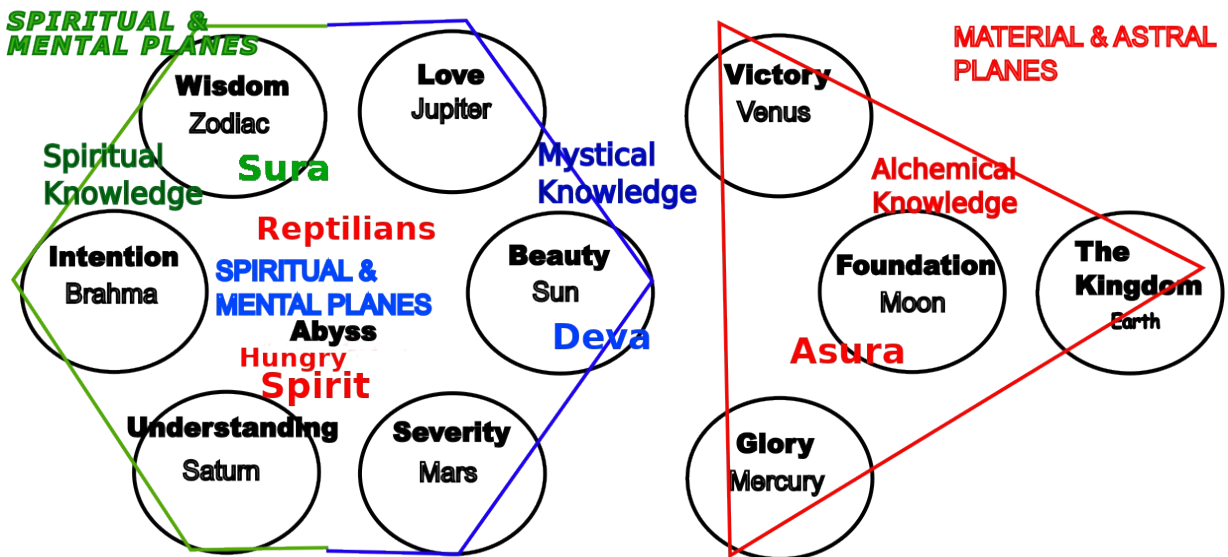

Illustration 4: Contrasting Mental-Spiritual Plane Vs Material-Astral Plane

The thesis of the previous book, **the Egotrix Matrix**, holds that **human beings** are native inhabitants of Planet Earth but at some point in their evolution this has become **the object of**

attention by intelligences alien to Planet Earth, beings included in the Sura and Asura macro-categories.

Suras, benevolent spiritual beings, then consciousnesses in energetic/etheric form (without body or form) would be those who live in the mental/spiritual planes and would create technologies to bind ethereal bodies with information content to humans based on their space-time coordinates at the time of their birth. An **early creation** may have involved only the personality archetypes referring to **Saturn, Jupiter, Sun and Mars**. Where the Mars archetypes could have been a reflection of some **Reptilian** or **Reptilian and Martian** species.

Instead, **the Asuras**, beings that tend to be malevolent (full of negative emotions such as anger and fear), which include some Reptilians, Greys and Hungry Spirits, among others, would be the integrators of the first creation.

There is evidence that about 15-20,000 years ago there was a major clash probably involving **two different species in the Orion galaxy** and the famous city of **Atlantis** (still located under waters 700 miles from Portugal)

This second creation, concerning the **Astral triangle** (archetypes of Venus, Mercury and Moon) may have always existed in part but "surely" was affected by the so-called "**fall**" as described in the **Jewish Qabalah**.

This "fall" could refer to both the establishment of **the so-called "Kingdom Consciousness Control System"** and the type of use of this type of archetypes/bodies/containers.

Indeed, the Egotrix Matrix predicts that we, human beings, **have become a reflection of the creators** of this personality matrix.

The real Suras and Asuras would be benevolent spirits, hungry spirits, Reptilians, Greys or other extra-terrestrial species, while Deva and Asura(2) would instead be the human beings assigned the various zodiacal personality archetypes.

After the conflict, about 15,500 BCE, described in the **consciential chronology** of the book "The Egotrix Matrix," it may be that **some Asuras** used the archetypes of **Venus, Mercury and Moon** as if they were puppets and thus no longer for simulative purposes, as **intended**

by **the original creators**; but for purposes of entertainment and possession (via chips and active memories) through **unspecified control stations** (Space Ships, Moon, Antarctica, at the moment unknown).

Period	Events
50.000.000 BCE	Homo Sapiens
500.000 BCE	Peoples and civilisations of the Earth in Mesoamerica, Mesopotamia, Africa and the Himalayas (Aryans)
15.500 BCE	War Deva – Asura - Possibile 20/25.000 BCE - Beta Yuga Yukteswar
Victory of the Asuras	
9500 BCE	Atlantis submerged by the waters in a single day.
6700 BCE	First Written Vedas
Victory of the Deva	
5500 BCE	Conceptual Birth of Religions and the Conscious Kingdom Control System (Sun - Path of the Gods + Saturn - Path of the Fathers)
3500 BCE	Polarity Reversal Indo-Iranian Vedic Mythology in Ancient Persia (Deva become Ashura and vice versa)
3138 BCE	Bharata War
3114 BCE	Date of Creation of the Maya - Adoption of the Solar Calendar
3000 BCE	Transcription of Formal Vedas (transcription of earlier original oral traditions)
600 BCE	Birth Religions (Sun) and mystification of biblical and Vedic/Puranic events (control system - prophets).
Year 0	Jesus Christ - Fictitious Formality of the “Consciousness Control System”

Illustration 5: Conscientious Chronology of Planet Earth.

This fact would highlight the **contrasting tendencies between Suras and "post-fall Asuras"** but also between **human beings themselves**. Those more related to ethics, feelings

and tending to be less predatory and those more related to materiality, aesthetics and predation.

In the concluding chapters of the Egotrix Matrix I had made it clear, that by my interpretation of various "**signs**," including the 1999 filmography, some of these Suras and Asuras are talking to us and others are also "playing" with our economy to let us know that it is **time for renewal**.

Considering that **we injure and kill ourselves for our Ego**, i.e., simply because we cannot stand our fellow man, his choices or needs at "time t", it is equally true that at "time t," **in the Universe, there is all the information needed to satisfy any need or choice of any of us**.

This may mean that the solution in order to maximize profits and minimize losses, both the "**awareness at "time t" of "predator and prey" as compound blocks**.

That is, at "**time t**," each of us can be prey, predator, and/or supervisor but, at "time t," each of us can get the **information we need** not to be prey, predator, or supervisor.

In species naturally constituting the roles of prey and predator, intelligent enough to be able to communicate with each other, evolution results in creating spaces and tools in order to be able to meet each **other's egoic needs at "time t"**. These needs are met with a certain level of security, and at the same time, increase the awareness at "**time t**" of both poles so as to foster an exchange of information and energy to the point of better enduring each other.

This process could find its **apogee** precisely in the **right "prey-predator" combination**.

For example, in the **wild**, the Lionesses hunt and care for the young while the Lion defends the herd and fights against other males who want to supplant him.

In **Nature**, the average lifespan of a male is 9-10 years, while females can live up to 15 years. In contrast, although the Lion is predatory, **in zoos** (where it essentially does not prey) the average life span is **18-20 years**.

<https://www.focusjunior.it/animali/animali-selvatici/la-dura-vita-del-leone/>

<https://www.zoodipistoia.it/animali/leone-africano/>

*"Lions at the zoo eat a diet similar to their counterparts in the wild. They are usually fed **red meat**, such as **beef** or **chicken**, which may include **bones to promote dental health**. In some cases, they may also receive vitamin supplements to ensure a balanced diet."*

Clearly, in this case, I cannot say whether it is a "**Hospice effect**" where sometimes the elderly stay for a long time "vegetating" due to degenerative diseases.

I simply believe that Lions experience a **dramatic decrease in the likelihood of being killed** because, in Nature, both to obtain food and to protect the group they must fight with other Lions or other predators.

*If all Lions knew they could live longer (twice as long), being paid in steaks to be watched, living secluded with their mate but **locked in a large cage**, what would they decide to do? Would they live in the Savannah or move to the City (to the Zoo)?*

If once at the Zoo the Lions discovered that there was a way they could live even longer and safely in the Savannah (in the wild), what would they decide to do?

This example from Leo sounds a bit like **the story of the Human Being** and the Matrix movie. With **industrialisation** some of the peasants and artisans went to the cities. With the arrival of **technology from other planets**, the cities experienced dramatic cost increases and the artisan slowly disappeared, absorbed by **multinational corporations or reduced to paltry profit margins** (except for those niches not yet impacted by the ongoing technological process).

Being able to admit that we have identified our **natural predators** and thus create a system that allows us to **coexist peacefully on the same planet** and then, over time, to merge our knowledge with theirs, so as to enrich the ethical-instinctive values of each group and facilitate a symbiotic coexistence. This means creating a **prey-predator union that is certainly in line with a vision of the Universe that aims for order and union**, that is, **it satisfies the concept of Entropy provided by Professor Corrado Malanga** and can be conceptual reflection of **the Standard Model of Particle Physics**.

This consideration is of vital importance precisely in light of what we have seen in the history of Humanity, which through **wars, reprisals, mystifications** and **contingencies** has yet to find

peace, and just like the alien species that have been visiting, observing and exploiting us for thousands of years.

PUBLISHUNBLISHUNBLISHING

With this hint of reflection, I introduce “**The Infotrix Matrix: The Universe is a Living Information System**”. Let us now understand **how the Universe speaks**.
