

SUMMARY: Chapters 1-11-14

CHAPTER 1

Introduction

8 years ago, I was travelling to Edinburgh. I was on the train and searching for information about the **relationships between various zodiac signs** on my phone. In particular, I was looking for details about the **Libra-Capricorn relationship**. I remember reading in the astrology section of a gossip magazine something like this: "*The goat or Capricorn eventually gets tired of Libra's ways, turns its head, and leaves.*"

Today, I can't even find that phrase online, but at that moment on the train, I thought about what had happened between me and one of my closest friends. At one point, **I could no longer tolerate his insistence** on wanting to know how much I was earning in the financial markets. I had told him that I didn't even have to think about money while I was still figuring things out, but every time I saw him, he had an obsession with knowing my earnings. The truth is, **I wasn't making anything at all**. However, my way of communicating this was probably too cryptic for him. From my perspective, his attitude came across as particularly invasive and possessive. Not to mention the period when I had a girlfriend and he did not. **He had turned into a pit bull**. Eventually, for these and other reasons, I decided that I would end our friendship and distance myself from him.

So after reading that paragraph in the gossip magazine, I began questioning myself: **How predictable are my behaviors? Why do I think what I think?**

In seeking answers to these questions, I started to delve into **astrology and spirituality**. I found some answers, but there were still question marks. During that time, after spending several months in **Edinburgh**, I moved to central **Glasgow**, and after reading **descriptions of the planets in the solar system**, I decided that one day I would write this book.

Then we moved to a town near London, in **Berkshire**, UK, and the COVID-19 pandemic hit in 2019.

What was also a **tragedy** became an **incredible moment of awareness**. Indeed, while we were all confined at home, thanks to the internet and my curiosity, I came across the work of **Mauro Biglino**, a former translator of the **Old Testament** for Edizioni San Paolo (Vatican). When Biglino realized that the most famous book in the world **did not speak of God** but of flesh-and-blood beings who came here to colonize the Earth, he ended his collaboration with Edizioni San Paolo and in 2010 began his work of disseminating his translations and what he had understood from these texts. (Several researchers are discussing this even in Anglo-Saxon countries; **Paul Wallis in the UK** and Michael Heiser in the USA are among them.)

At the same time, **during the COVID-19 context**, I noticed particularly accentuated dissonances in

the media world. **Professionals and doctors considered excellent were now being downgraded and insulted by previously unseen doctors**, often on mainstream television and during prime time. I thought of The Matrix and the book "**Simulacra and Simulation**" by Baudrillard, which can be seen in the opening scenes of the movie. Baudrillard claimed back in 1981 that contemporary society had replaced reality and being with "symbols" and that **human experience had become a simulation of reality**. It was as if everyone was playing a role imposed from above or by a system created for that purpose. The same film, "**The Matrix**", shows this characteristic of society.

In this informational context, I discovered the work of **Corrado Malanga**, a former professor and researcher at the University of Pisa, and thus began exploring the world of ufology. Malanga's curiosity, perseverance, and experience **led him to completely rewrite the history of humanity**. After years of study, Malanga discovered that the Pyramids of Egypt, among others, were not tombs but gigantic instruments **capable of extending the lives of pharaohs** at the expense of chosen subjects. This process likely occurred under the direction of alien entities with extraordinary knowledge interested in certain energetic properties of human beings. The 1994 film **Stargate** already hinted at something related to this subject for those who want to revisit it. The incredible work of Biglino and Malanga led me to make a series of connections and to conduct further research. I began correlating elements brought to light by various authors, **creating theoretical-practical correspondences with texts from Jewish culture** that I had read during my university studies.

At this point in the story, I found myself in a town in Berkshire (UK), a 30-minute train ride from the much-acclaimed London. I had gained good experience in financial markets and digital marketing through **online platforms** where people could also purchase my services and potentially resell them to the end customer. For several years, I also created my own company and managed the visibility of about **ten websites**.

I also managed my blog, occasionally using it to write content related to the studies of Mauro Biglino and theories of **ancient astronauts**. However, following the publication of one of these pieces, **something unexpected happened**. From my perspective, I was simply discussing public **information already known to thousands, if not millions, of people in Italy**.

One day, I was contacted by a **young woman, charming and knowledgeable in digital marketing**, who said she represented several leading companies in the technology sector that would be interested in collaborating with me. So, I had a few Zoom meetings where she confirmed her interest in working together. Essentially, I was supposed to organize meetings and talk about digital marketing, but at that moment, I didn't feel ready at all, so **I postponed the potential collaboration to a later date**. That was the beginning of the end.

Anonymous users began to **insult and aggressively attack me** on my blog. At first, I felt a lot of fear; **I felt like a pheasant at the start of hunting season**. I understood that someone had targeted me simply for being myself.

In the following weeks, **I saw some of my sites inexplicably lose traffic**; there was a bomb threat in the building next to mine with **police everywhere for an entire morning**. **An incident with unknown causes** occurred at London Paddington station on the evening of January 20, 2024, just ten minutes before I arrived at that station; during the same weeks, someone broke into the basement of my apartment and **cut the cables of my broadband** (photos saved and sent to family).

A series of **unfortunate coincidences** continued for months, and now we are talking about over two years. I felt spied on in everything I did; I often received anonymous messages with explicit references to private conversations held the day before.

Seeing some of my **sites lose traffic inexplicably**, I had the idea of creating a **live marketing tool** to address any injustices received from the digital world. It's a project I am still working on. Essentially, it involves collaborating with homeless individuals in the area by providing t-shirts with logos of companies to give visibility to the brand and some money to them. That's how I created **HDC Fund**, <https://hdc.fund>.

From that moment on, **I lost almost all the clients of my web agency**. It was as if the new content of the sites I managed was not being considered by search engines. I had spent ten years on search engines and built a decent online career, earning some money, but when it came to bringing my experience to local businesses, I was bullied by mysterious entities as if someone wanted **to make me feel useless, and destroy me financially and personally**.

During those moments, I thought of the "**Watchers**" from the **Book of Enoch**, but reconsidered as in Michael Heiser's "**Reversing Hermon**," or the Elohim as discussed in **Mauro Biglino and Paul Wallis's studies**. If one were familiar with the subject, they would know that some of these individuals, besides having **great knowledge**, also brought **significant injustices** to humanity. In addition to the attacks already mentioned on my websites, I frequently received attacks from anonymous users on my blog. They often contained **sharp words aimed at the heart**. It was as if someone was speaking to hurt, offend, and confuse my mind. I thought similar sensations arose when a friend showed **arrogance**. But the approach of these individuals was much more methodical and strategic, as if they were dealing with a **machine** and trying to send it into a tailspin.

It genuinely seemed as though they had been trained to psychologically and financially destroy me. The **unethical nature** of their behaviours convinced me that I was dealing with some **Asura, those gods or demonic spirits described in Vedic texts**.

Nevertheless, I felt I hadn't done anything wrong and couldn't understand why someone had unloaded **such hatred** onto me. Once the majority of the fear passed and realizing I was **still alive**, I began connecting events with other details of my mental map. I started thinking that these attacks were not ends in themselves but served a **particular function**. I reflected and realized that **this reprehensible experience was the same one endured by dozens or hundreds of people like me over the last 5,000 years** and perhaps even much longer.

Someone, consciously or unconsciously, or rather, a **military team** whose members had **varying degrees of awareness**, was testing me and, through their behaviors, was providing me with important information. Finally, I understood that their behavior had triggered **my deepest ego**.

Thus, another question was added for this book that I had already contemplated writing years earlier: ***Why do I feel what I feel? (meaning from the heart)***

Today, I could categorize the attacks into **three phases**. Those **directed at me**, those affecting **people close to me**, and the ongoing phase, which is **monitoring**.

The first phase, despite the anger and hatred developed on both sides during those attacks, ignited within me **a harmonious vision of the Universe**, a kind of Sci-Fi solution to the imbalances of the

Universe. Almost as if the fear I experienced allowed me to perceive the pain of my aggressors. This made me realize that **some people**, including those like me, if properly stimulated, can have **flashes of 2-3 seconds** where they see images referring to a plausible situation, reality, or solution. **The second phase** left me perplexed and disappointed for about 2-3 months, but then I received two more visions spaced 1-2 weeks apart, where the second vision was merely a detail of the first, as if someone wanted to tell me that the first vision was true; these were visions of death, and **they somewhat relieved me**. Not that I was happy about the death of my aggressors, but I thought that somehow divine justice would take its course. **I created rules in my mind to reinforce these visions**, and if what is written in this book makes sense, the non-occurrence of certain events could mark **the beginning of overcoming "Maya,"** the illusory web of the Zodiac. Indeed, I feel like a **victim of a process** that could or is already leading to the death of a dear colleague or potentially even myself. **Death for death** would incredibly also be one of the daily consequences of the Ego versus Ego conflict and thus **the apogee of the message contained in this book**. This experience illustrates, like the "Prophets" or those classified as such, whose birth dates, in my opinion, have precise astrological and astronomical correspondences, namely **Capricorn, Aquarius rising, Leo Descendant**, would be a "category" of people used as "punching bags" by the gods over the last **5,000 years**.

However, upon closer analysis, I don't believe this process has been purely malicious on the part of my aggressors or whoever they may be. On the contrary, I believe it was a well-designed method, a sort of **agreement between gods/alien species**, aimed at developing a **Kingdom/Earth** that takes into account all forces at play.

The **third phase** is still evolving, and we'll see what the future holds for me. I can only say that I meet people only in **public places** and **during daytime hours** (10 am - 4 pm). Additionally, I know they have tracked my broadband, my bank account, every login and online search, my phone, my social media (which I no longer have), my residences, and the people connected to me. I often reset the computer and use a laptop with **4-5 active servers** that allow me to destroy any tracking whenever I wish. This phase, which I am still experiencing, has **only further confirmed the issues raised in this book**.

This experience has indeed **brought me a lot of pain, but it is not entirely negative**. As mentioned, during the first phase, I had an important vision, something I don't have enough knowledge to realize, but it could signify the start of a new phase for **planet Earth**, and perhaps, if humans have been used for some kind of **simulation of the forces present in the Universe**, for the **entire Universe** as well.

During the attacks, I wondered how **biological or mechanical entities**, seemingly so awake, capable, and powerful, able to **alter local and digital reality at will**, could spend so much time on someone like me, **apparently insignificant**.

Thus, my reflections on this experience only confirmed the main thesis of this book. **These individuals were interrogating or training my machine, or if you prefer, my software**.

In my view, the human being appears to be a hybrid with **predefined mental patterns and ethereal attributes attached** according to the **space-time coordinates** of their birth, upon which, for various purposes, three groups of alien entities with unimaginable knowledge have worked. Two of these

groups would be the current managers of the planet, while **the first group**, those of the creators of the first archetypal zodiac, or at least some of them, would belong to **planes of existence different from the physical** or even other dimensions and thus would have assigned the role of spokesperson to the so-called "**Prophets**" through the system known as "**Zodiac**" and to the other two groups, the famous Sura/Deva and Asura of the Vedas, the ancient Sanskrit texts.

It seems that some of these entities have succeeded in **linking the physicality of the human being to visible ethereal components**, which, to my knowledge, can only be tuned into other planes of existence. With this perspective, it becomes evident that over time, the human being has become a reflection of these **three groups of alien entities**, with their **needs, vices, and virtues**.

Thus, the "**Egotrix Matrix**", which I had already intended to write when I saw the characteristics of the **planet Venus**, has become **complementary to two other books** I will complete in the coming months.

PUBLISHUNBLISHUNBLISHING

PUBLISHUNBLISHUNBLISHING

- We know that the **Vedas**, oral traditions, were formally transcribed, some say 'in haste but in detail', around 3000 BCE but were already present in more rudimentary written forms, probably around 6000 BCE.
- We know that between **1500 BCE - 500 CE** the ancient Vedic and Biblical scriptures/knowledge were mystified into Religions.
- It would seem that in the more chaotic and darker phases of history, where some of the Asuras became particularly aggressive, they were often accompanied by characters who adopted a form of magic considered evil or '**black magic**'.
- We arrived around **year 0** but only after the famous **Bharata War** in **3138 BCE** in India and following the adoption of the **Solar Calendar** by the Maya in **3114 BCE**.
- These three events, Bharata, Maya and Year 0 would all seem to be connected to the adoption of the **Solar calendar** and the formality of the '**Kingdom Consciousness System**' based on the archetypal concept of the '**Holy Trinity**'.
- We know that religions have been '**personified**' and '**idolised**' without a historical basis, but these characters (Jesus, Buddha, Noah, Moses, Ezekiel, ...), regardless of whether they existed or not, would seem to be like **markers of personality and functional archetypes**. Indeed, they seem to indicate '**light-bearing**' figures in times of darkness. (among other things, identical function of '**Satan**').
- We know that religions arose through the mystification of older sources of knowledge, **which did not speak of any caste or religious hierarchy**.
- We know that ancient traditions **in 1500 BCE**, new religions in **500 CE**, and filmography in **1999 CE** often take up the **same archetypal concepts**.
- These considerations confirmed the zodiacal archetypal extraction I made from the **Tree of Life** (Christian matrix) of the '**Holy Trinity**'; that is, there is a pair of subjects who at some point in their lives will tend to isolate themselves and their integrity will be threatened by the '**Serpent**' archetype.
- This subject pair will correspond to a **Capricorn, Aquarius Ascendant, Leo Descendant** and a **Cancer, Virgo Ascendant, Pisces Descendant**.
- Since the criteria used in this simulation to determine these archetypes are the **distance of**

the Sun from the Earth and an artificial criterion (perhaps related to the equinoxes at a given time), the Holy Trinity par excellence will be Capricorn first decade (the most material) combined with Cancer third decade (the most spiritual).

- The clash/encounter between the '**Serpent**' and '**Prophet**' archetypes seems to cross the last millennia through Puranic tales (3000 BCE), Biblical tales (1500 BCE) and the filmography of 1999. This is **irrespective of the technological knowledge of the time.** Indeed, it is likely that in times past, encounters also took place physically.
- It seems to be a tried and tested practice that in this confrontation there is on the part of the Serpent, the assault and **debasement of the Prophet, the enticement and/or violation of his woman or women/people close to him,** even to the point of the termination of **people close to him.** (killing/liberating the ego)

This is where the 'mental' stages of my experience come in.

I was born on **24/12/1985,** in the morning and my archetypal zodiac configuration is **Capricorn, Ascendant Aquarius, Descendant Leo.**

The zodiacal configuration of my colleague, with whom I spend much of my time, is **Cancer, Ascendant Virgo, and Descendant Pisces.**

- **About 10 years ago** (it may have been a year more or less) - I saw an interview (on the Terra dei Fuochi case in the vicinity of Naples (IT)) of a **young mother aged '35'** on TV identical to my colleague. She was already dead when she did the interview. My colleague is '35' right now.
- **About five years ago** - seeing my colleague climbing the stairs of the 'office' with difficulty, **I cried for two days in a row.** (I hadn't cried for 20 years and I never cried like that except when I was a child).
- **2.6 Years ago** - my colleague and I have '**dreaming sessions**', lucid dreams. In some of these, she is lying on a lake and **is pierced by swords.** (Similar episodes are cited by **Corrado Malanga,** the world's foremost expert on alien abduction) During this same period, in some lucid dreams, I see something luminous/vortical in my ethereal body, capable of attracting or **absorbing luminous greyish spirits.**
- **2.3 Years ago** - my colleague informed me and her boyfriend that she was having **very intense "Hard" dreams.** Where he feels like he is having sex with multiple "members" but doesn't understand or see the details.

- **2 years ago** - I was contacted for possible cooperation in digital marketing by a representative of '**large technology companies**'.

- **1.5 years ago** - my colleague's site inexplicably lost traffic.

- **1.5 years ago** - as I walked away from the possible deal, **my customers' sites started losing traffic one by one.** (these are examples because my original account was hacked)

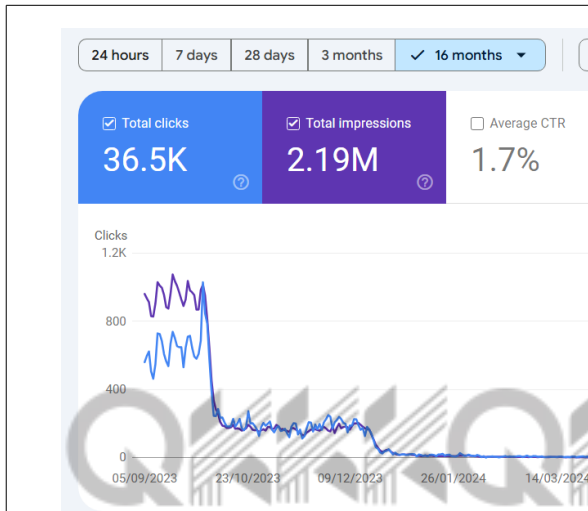

Illustration 1: Detail "Site 1" Losing Traffic

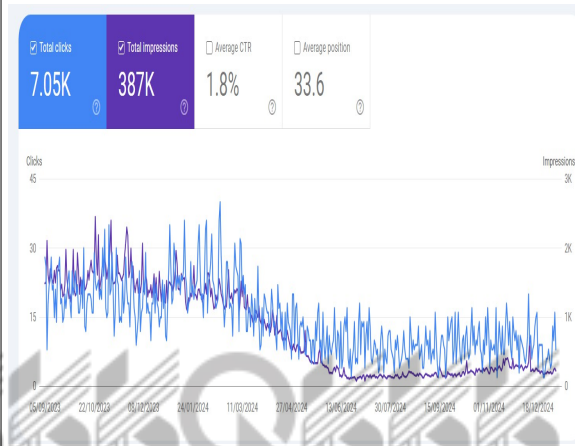

Illustration 2: Detail "Website 2" Losing Traffic.

- **1 year ago - Incident in Paddington** 15 minutes before my arrival for an overnight meditation with my girlfriend.

- **10 months ago - Cut my Broadband cables**

Illustration 3: Home Broadband cut off

- **9 months ago** - I set up a live marketing system with the potential help of the 'homeless' in the area (<https://hdc.fund> - the area where I live was full of them) and I lost traffic to **all my web agency's sites**; by a strange coincidence all the search engine algorithms also change, so the very product I had seems to stop working.
- **9 Months Ago - Chipping my colleague.** They listen to us and see that we are in a **shopping centre** to take walks and talk.

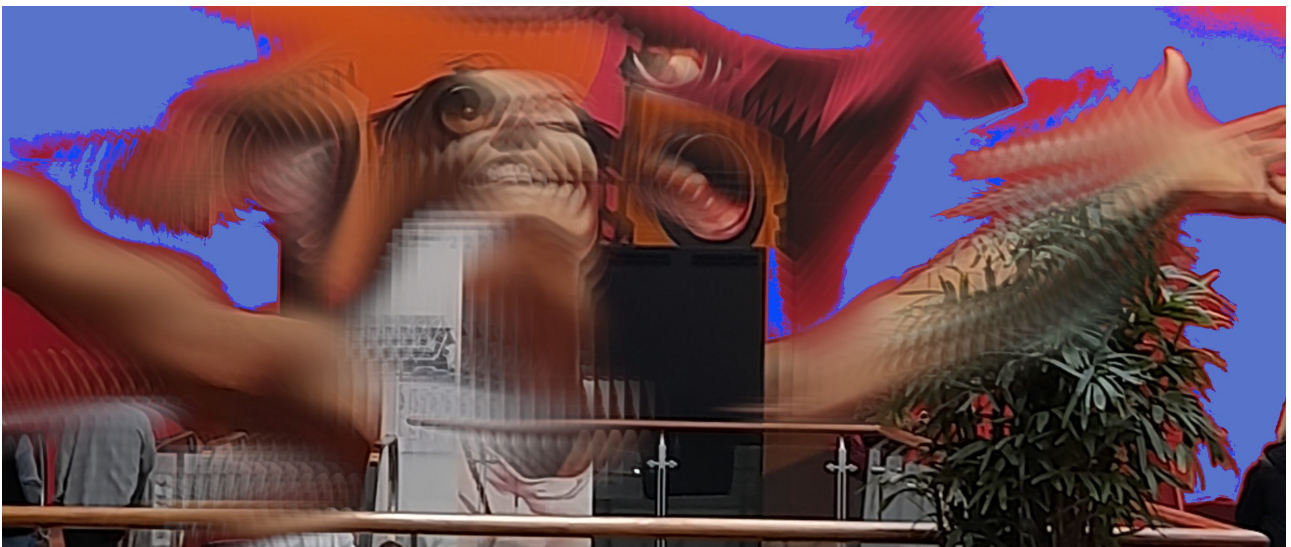

Illustration 4: Photo similar to colleague on Mall Wall with arms outstretched in the sense of liberation but with camera in one eye - blurred and with colours changed so as not to violate artist's rights. - meeting point between colleague and myself. (whatever author is not responsible for the process I'm describing in this book)

- **9 months ago** - In the shopping centre where we were meeting, a background appeared with a woman identical to my colleague and a **music box (camera/chip)** in her left eye.

Illustration 5: Photo detail eye colleague

- 8 months ago - I listened as I called my colleague 'flea' and **started receiving messages from users called 'flea'(...)**.
- 8 months ago - A **porporean 'bodiless' spirit** at the corner of the bed asks permission to **enter the body of my colleague**.
- 8 months ago - **My posts on 'geopolitics and technology' were deleted from well-known social media**.
- 8 months ago - **They broke into my computer and managed to see the first part of my book**.
- 8 months ago - My colleague started **asking me about trips to remote or hyper-technological places**.
- 7 months ago - My colleague started using **NLP techniques to recall the concepts I had expressed in the first part of the book and get me to talk about the book**.
- 7 months ago - After **surviving the first part of the attacks** and after I had informed a colleague the month before that I would be working in a restaurant if I changed my ways, a restaurant called '**The Rising Sun**' opened on my street - an elegant, well-detailed place for the average Englishman and almost immediately filled with customers.

- 6 months ago - I started receiving messages to support non-profits, hospitals, and non-profit companies that help **people with cancer, at the same time as my colleague started having serious bowel problems.**
- 5 months ago - They **chipped my mother.**
- 5 months ago - My colleague, while we are in a café in London, tells me that this is **her last year.** (for me it was the chip, active memory or 'no-body' talking) - This is repeated in the 'office' the next day.
- 5 months ago - Talking to a Colleague, I think it was "the Bodiless" or Chip speaking, she told me that she had to go to the **"bard"** and I didn't. (the bard would be that place where our spirit goes as soon as we die on the material plane, "theoretically" for some books)
- 4 months ago - I asked my colleague to do a **mental simulation** with me (15 minutes), just as Corrado Malanga indicated; although I insisted and made myself available, she **did not want to proceed.** (this may be part of her personality but I mention it because I have seen unusual and particularly egotistical behaviour several times since she was chipped, sometimes receiving personal insults never heard in 14 years of friendship)
- 3 months ago - My **mother** started using terms not proper to her language such as **'prevaricating'** in messages on her mobile phone while **one of the priests** in the dioceses I attended started posting articles on **well-known social media** about a phantom 'Don Fagiano' that often trace my Internet history and some of the concepts expressed in the beginning of this book. (sometimes meaningless articles)

So, although I had already had the impression that **I would one day part with this colleague of mine in advance**, and I also had a potential year (which I didn't want to believe, just because of the closeness of the date); I had also made my peace with it, since people die every day for various reasons; I found myself with the team of **deadly vipers** doing everything they could to hinder me and my business and then hinder **the relationship between me and her** (in the face of the misunderstandings and stress caused by the raid) just **two years before that date** and even though I wanted to stay away and get away from that context, I ended up being chased by these **'soldiers' or 'hunters'** until they managed to lock up my colleague and there they started to 'calm down' but made my **relationship with her even more difficult.**

It is very important to understand that once chipped, **you cannot recognise your thinking from the thinking induced by the chip+active memory.** (while from the outside you can't tell if you are talking to the original or the other, they are like two alternating things)

A similar thing happens when you have a **bodiless spirit** inside you. Sometimes the spirit inside you can control your mind and make you do or say things that you do not have the knowledge to

say or do.

Sometimes she would tell me things that the next day she would deny having said.

Clearly, for a person unfamiliar with this world of **chips, aliens and UFOs** described by **Corrado Malanga**, it is very difficult to believe such things.

In everyday life, this still happens, but not for very particular, specific and unusual phrases and concepts, such as 'I indeed have the chip' and then a week later 'it is not true, I have nothing'.

There is a **documentary film** I remember watching about 3-4 years ago, '**Phenomenon**' where some alien species visited a **school in South Africa** and mentally told the school children to be on their **guard against technology** (technology is evil, that was the gist).

The **technology** in itself is not evil, but since it is brought to the planet by **species other than humans**, depending on the intentions of the individual controlling it, it can certainly be a **threat**. Talking to 'the colleague' in London, she made me realise that a chip and an active memory could also lead to death by a **remotely triggered electrical impulse** or even to the **person's own induced suicide**.

There is an image showing the relationship between **the duration of the emperors of the Holy Roman-German Empire** and the **Hebrew rulers of the Bible** where there seems to be a remarkable parallelism, just as if someone already knew when to press the 'death' button.

In today's highly connected society, it is also vital to understand that every message read or listened to generates an **electromagnetic impulse in our mind**, which processes it to generate apprehensions and inappropriate choices.

That is why the media can move us left and right, telling us that we are better off here or worse off

there. Or **make a person look good or bad**. Create **the issue of climate** or CO2, Wars, etc...

Returning to my colleague, it is also important to note that the **Trinity archetype** is 'technically' the most suitable for sacrifice because it has **perceptions that tend to the spiritual planes** (Pisces descendant = Jupiter) and is, therefore, less attached to the material plane.

So, 'technically', this conscientious system certainly has **remarkable points of wisdom** but also a **very deep macabre side**.

That is, to see the human being on the material plane as an object, a robot.

Thus, although there may be mental/spiritual planes to which one can theoretically return in the form of energy, there remains a serious problem of **affection and memories** as well as the **agreement between the parties involved**, which, with today's awareness, makes this **conscious system awkward in the eyes of the Universe, especially if individuals or AIs are needed to make it work**.

To recapitulate, from my point of view, the '**Serpent**' team, whoever makes it up, has only the role of '**finaliser**' of an **artefactual Consciential process**. That is, the process I am describing with this book which would be nothing more than the synthesis **of the Wheel of the Zodiac**, or the **Illusory Wheel of Maya**:

- There are machines, soldiers or humans (exploited without their knowledge) run by **Reptilians and/or other alien species, who run the media** through chips and active memories; these create **electromagnetic impulses** through the news. The usual war between good and evil; Russia - America; Israel - Palestine; Big cities big opportunities.
- **Dangerous situations** and **economic instability** are created to **increase prices** (especially in city centres/large towns) and create a **difficult economy**.
- At this point, to gain visibility one has to go through the **city centre** where **rents are stratospheric** or through **digital marketing** where everything is **monitored and under control**. This does not mean that a person cannot be successful online. I was 'successful' online until three years ago. This means that if you are a person, who for some reason is seen as an obstacle, your visibility will be hindered or swept away by invisible hands. **In short, there would be a lack of real freedom of expression and opinion**.
On the other hand, all this could be a **planned and calculated process**. Precisely the "**Kingdom Consciousness System**", a simulation.
- A **calculated Plan B**, based on strong coercion and bullying, is proven to **fail**. **The Covid** period was an example of this, now there is the '**Ban**' programme from social media - that is, make yourself invisible on social media and in newspapers; accompanied by unjustified energy price increases.

- **The prophet is contacted and debunked**, who sometimes 'resists' and gives **Plan A**. And everything goes back to the way it was before. but the prophet goes to the cross or the Trinity leaves with the spirits or both or something like that.

Thus, the abductions of the Brahmans, Noah, Moses, Jesus, Ezekiel, and Neo in the Matrix are always the same. Equally, **the abuse/termination of their wives is part of the same process**. In my perception, this '**abuse/abduction of wives**' would also serve to make the Prophet aware of the vices of some extra-terrestrial species.

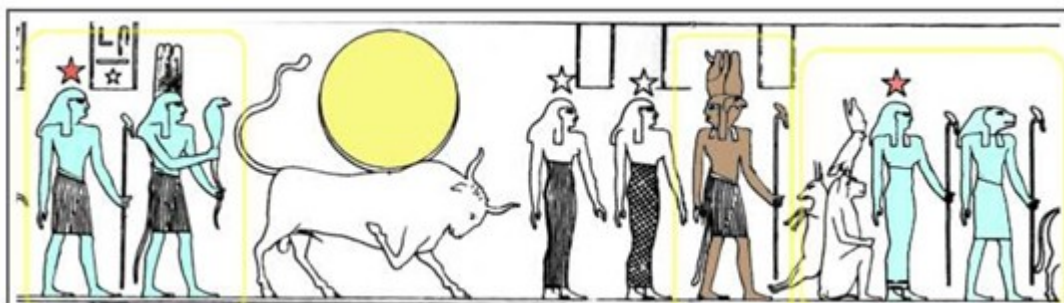

In my opinion, this would be the last **conscientious agreement of the Kingdom** established with the **date of the creation of the Maya** and thus with the adoption of the **Solar calendar** throughout the world, after the **Bharata War**.

This consciential arrangement would be a system whereby information or certain information is only **released after the clash/confrontation between the Prophet** (Capricorn, Aquarius Ascendant, Leo Descendant) **and the Serpent** (with some Reptilians as participants).

This meeting will take place thanks to the archetype of 'Trinity', **Cancer, Ascendant Virgo, Descendant Pisces**; she will fall in love with the prophet, like the prophet with her, and together they will tend to isolate themselves, to live their love privately. Until, one fine day, the **Serpent, Agent Smith**, arrives **and spoils the party**. It is important to understand that the 'Trinity' does not necessarily have the same perceptions as the Prophet, as is the case in the film The Matrix.

Sometimes he can be a 'passive' element in the process, exactly as implied in some ancient texts.

Since a picture is worth a thousand words, I show a few more that recall the concepts we are discussing.

*Illustration 7: White **bull with Sun** on his back (symbol of the **Book of Enoch**) and figurines representing zodiac signs - some with '**5-pointed star** on their heads (sign of possession/protection) - Photo Credit: *Mysteries of The Egyptian Zodiac - The Long Denderah Zodiac**

Illustration 8: Zodiac sign Cancer with Soldier behind him who looks like he wants to kill him; Zodiac sign Virgo holding Leo at bay; Snake above Leo – Photo Credit: Esna Zodiac (Luxor) – Mysteries of The Egyptian Zodiac

Illustration 9: Sauroid-like being holding tied to a chain White Bull with '5-pointed star' on his head ready to be skewered. Photo credit: Mysteries of the Egyptian Zodiac – Lond Denderah Zodiac

Illustration 10: Lion with 'child' on its shoulders with Sauroid-like being on the right next to a Serpent – Photo Credit: Mysteries of the Egyptian Zodiac – Petosiris Tomb

Illustrations 184-185-186 with that Sauroid-like individual (**Reptilian**) officially could refer to 'Turut/Taurut' but we know that officialdom is not always the truth.

The deity **Turut**, also known as Taweret, was an Egyptian deity associated with the protection of motherhood and childbirth. Represented with the body of a woman and the features of a hippopotamus, Taweret was considered a protector of pregnant women and children. She was often invoked to ensure a safe birth and to ward off evil forces during labour. - AI 2024

Returning to the encounter between the Prophet and the Serpent.

PUBLISHING PUBLISHING PUBLISHING

This confrontation must be bloody and **undermine** the prophet's **pride** and stability to obtain the '**Vision of the Harmony of Things**'. (**pride** is the vice of the **Lion** archetype, related to the Prophet's descendant)
It is therefore essential to ridicule, humiliate and debase him to see if his mind can take it.

By my observation, and we will see the underlying basis for this in a moment, this arrangement was probably brought about by the fact that **some of the Asuras** (including **some Reptilians**) demanded to guide the human being at will without submitting to **previous, potentially more ethical and less binding agreements**.

Certainly, as witnessed by several Puranas and some Biblical events, **in the past** several alien species were here **physically**, but today they use technology to find, track and reach people's containers; moving with **chips and active memories but also simply creating electromagnetic impulses from media and filmography**.

Using respectively the **astral, mental and spiritual planes** of which we Humans have little perception.

What We Know About the Serpent

In a **recent documentary** by Graham Hancock (historian, and media expert), Ancient Apocalypse, they talk about an archaeological site in Ohio, 60 miles from Poverty Point.

***Graham Hancock** is a British author and journalist known for his unconventional theories on ancient civilisations, archaeology and history. He gained notoriety with his book *The Footprints of the Gods*, published in 1995, which suggests that advanced civilisations existed thousands of years ago and were lost to catastrophic events. Hancock often challenges mainstream archaeological views and advocates the exploration of alternative historical narratives. His work has aroused both interest and controversy within academic circles. - AI 2024*

These are Hancock's words:

***"Poverty Point** is one of the largest and most complex ancient sites in North America. Its oldest sections date back 3,700 years (this is the current estimate but then it is all to be seen).*

This Poverty Point would be a huge structure called Tumolo A (Site/Hill A)

*The **three main mounds of Poverty Point** are aligned exactly north to south with the Lower Jackson Mound, which is much older than Poverty Point, dating back to 3500 B.C., or 5,500 years ago. Yet the builders of Poverty Point were not only aware of this, they used it as an anchor for the entire site.*

*The flat horizon all around allows one to observe **the rising and setting of the Sun, Moon and stars**. Archaeoastronomer William Romain discovered that these important dates, the solstices, the **longest and shortest days** of the year respectively, were marked at Poverty Point by a cleverly designed system of alignments." - Graham Hancock*

Later in the documentary, Hancock mentions a **giant snake**, 400 metres long, not far from Poverty Point.

Illustration 12: Serpent Mound¹⁹⁹ – Photo Credit: columbusfreepress.com

Let's read what Hancock says in the documentary:

*"Sixty miles northeast of Poverty Point, Ohio, lies a site that may hold the key to understanding what happened to the **lost civilisation** I am seeking. Perched on a densely wooded ridge is an extraordinary Example of an effigy mound, a gigantic earthwork **moulded into the form of a living creature**. In this case, a **400-metre-long snake** is called the Serpent Mound. Starting from its twisted tail, **seven curves in its body** wind their way up to its head, where its gaping jaws seem about to swallow another oval earthwork. Even from the air, it is difficult to perceive all the details." - Hancock*

Illustration 13: Serpent Mound₂₀₀ - Photo Credit: roadrunner.travel

"**Serpent Mound** stretches for over a quarter of a mile from its northwest jaws to its tail in the southwest corner of the hilltop. Originally, there was a circle of standing stones near its head. If you fly over Serpent Mound during the **summer solstice** around 21 June, you will immediately notice that **the snake's jaws are aligned almost directly with the point where the Sun sets**. You can see that the snake's head seems to be looking for the Sun, and as the Sun begins to set, it becomes clearer." - Hancock

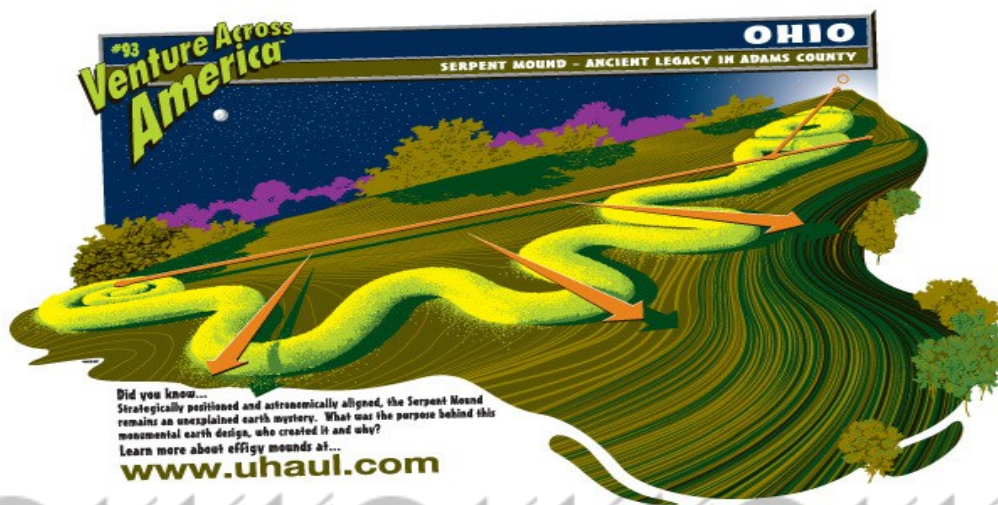

Illustration 14: Serpent Mound₂₀₁ - Photo Credit: curiouscraig.net

"The centre of the second curve behind the head points east, towards where the Sun rises during the summer solstice, and the centre of the next curve marks the rising of the Sun during the spring and autumn equinoxes when night and day are the same lengths. The centre of the last curve is oriented towards the point where the Sun rises during the winter solstice, the shortest day of the year. As for that intricately twisted tail, if you draw a straight line from its exact centre across the hinge of the snake's jaws, you will find that it is exactly oriented towards true astronomical north. It is a work of genius, yes. ...by prehistoric Native Americans. Yes. And that genius is easily overlooked, indeed." - Hancock

"The snake's mouth was exactly centred on the Sun about 12,800 years ago, at the end of the last Ice Age. But any celebration of the end of the ice would have been short-lived, because around 12,800 years ago when the snake was perfectly aligned with the summer solstice, something huge was happening all over the planet." - Hancock

Illustration 15: Serpent Mound₂₀₂ - Photo Credit: earthworks.osu.edu

"The snake's jaws are aligned almost directly with the point where the Sun sets."

And the Sun sets in the Seventh House. The Descendant.

Often in astrological descriptions (linking it to the potential partner or similar things), no importance is given to the descendant, instead, it is the one that moves us (I associated it with the Soul) and it is the one that identifies the Prophet/Prescient/Elect.

In the book Chaldean Astrology, about **the Sun in the Seventh House**, George Wilde wrote:

*"good for partnerships, honour, distinction and business; **opposition from powerful people**; a likely public position; a good marriage partner, independent in character."*

Nothing unbelievable but I wanted to mention this detail, *why would an individual with the Sun in the seventh house find opposition from powerful people?* Now we know. (Leo is the Sun too)

*"The centre of the **last curve** is oriented towards the point where the **Sun rises during the winter solstice.**"*

*"The seventh bend on the winter solstice, the prophet par excellence: **Capricorn, descending Leo, ascending Aquarius, first decade.**"*

The centre of the **second curve** is towards the **Summer Solstice**, the **Cancer** archetype, The Moon. The **spring** and **autumn equinoxes** remind me of the handshakes of Leo and Virgo and Pisces and Aquarius in the 'Big Esna Zodiac' of Luxor in Egypt. (clearly, these of the Serpent, I don't know where they point to, but somehow they always speak of Light and Darkness)

How many signs we have scattered around the world, in ancient texts, in religions, in filmography that always speak of these **same concepts**?

These archaeological sites are also ways of remembering dates and events. That is, these sites themselves represent **coordinates in Space-Time**.

In the documentary, it is said that the Serpent can be dated to **around 12,800 BCE**, this is **very possible** but it would need to be better investigated using '**soil stratification**' dating methods as outlined in **Michael Cremona's** research.

Maybe they show dates far away and do not consider them at all.

However, once again, **astronomy, astrology, solstices, equinoxes, archetypes, prophets, and serpents, resonate in monuments** as in **ancient texts**.

This may also be a sign that the 'Serpent', i.e. certain species of **Reptilians**, came into contact with our world from the **Americas** and, in my opinion, still run part of America today.

But we can combine more information and arrive at a **much more satisfying ego profile**.

The Enigma: Sura and Asura

We had spoken of **Suras and Asuras in the Puranas**, the Fifth Veda, and had seen how the Reptilians were classified as Asuras.

Then we saw a game, an enigma published by Frawley about the Deva (part of the Suras) and the

Asuras.

From this astronomical game of the Vedas (1500 BCE), I extracted zodiacal teams:

Squadre Zodiacali	Deva/Humanoid demigods	Asuras/Demons
Planets	Jupiter + Sun + Mars	Venus + Moon + Mercury
Signs	Sagittarius & Pisces + Leo + Aries & Scorpio	Libra & Taurus + Cancer + Gemini & Virgo
Saturn: Capricorn + Aquarius		

Table 1: Zodiacal Teams Deva/Semi-Gods Vs Asuras/Demons

If we look closely we discover that these zodiacal teams, despite being 3000 years apart, are identical to the **Ethical Triangle** and the **Astral Triangle** of the Qabalah (1500 CE).

Let us look at the two graphs and compare them.

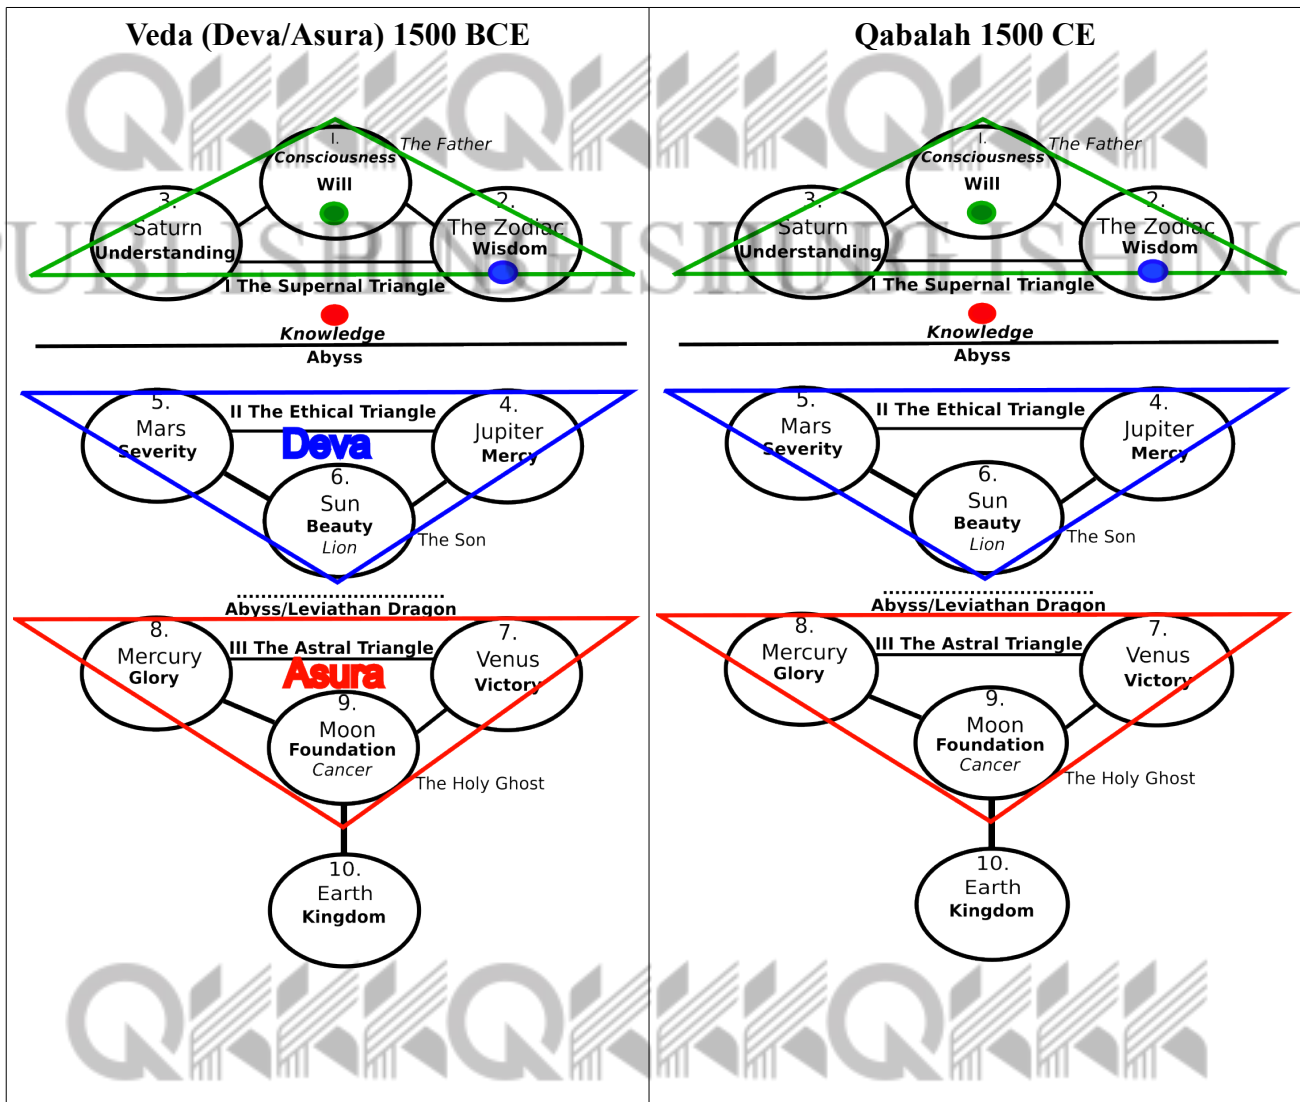

Table 2: Comparison Deva Asura - Veda - Qabalah

So now we know that the **Ethical Triangle** represents the **Deva**.
While the **Astral Triangle** represents the **Asuras**.

I also want to consider the idea that there is not necessarily an actual **Authority of the Ego** as I described it in the Chapter on the **Qabalah**.

We could also see the tree horizontally and realise that there is a **Material pole**, where the **Venus** archetype is the apex, and there is a **Spiritual pole** where the **Jupiter** archetype is the apex, while **Saturn** would be the **arbiter**, as outlined above.

One could also think that the archetypes identified in the **Astral Triangle** were created later, in a **second archetypal creation**.

Let us try to represent this hypothesis graphically.

The First Creation

The first creation would have been composed of the archetypes related to **Saturn, Jupiter, Mars and the Sun**.

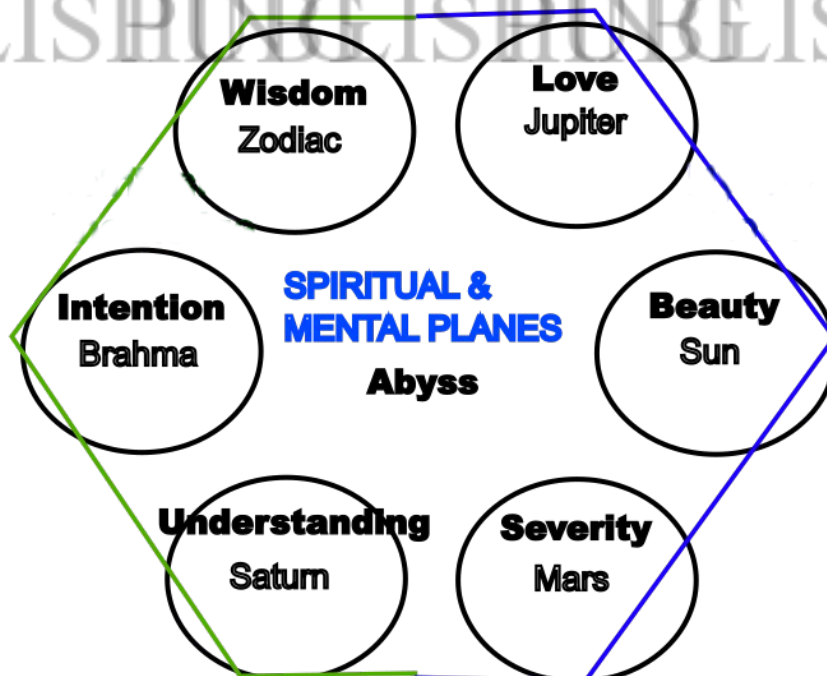

Illustration 16: First Archetypal Creation

These Archetypes could all have been created by **spiritual beings**, who live and work at **high frequencies** (hardly perceptible on the material plane).

I put the **abyss** in the middle because that is where the 'hungry spirits' reside, and they probably represent both the **opposite of the creator(s)** but also the **beings most similar to the creator** (in terms of faculties and powers, that would be '**Deux Machina**' from the Matrix, or those spirits that might have acted in that **South African news case**).

So these too, being ethereal, will be able to move in the **spiritual planes**.

Religions always give the abyss at the bottom for **ethical reasons**, it could also be that certain spirits are only visible at **very low frequencies** and therefore I should place the abyss **below the material plane or simply consider the abyss on the spiritual plane, as I have already done, but knowing that they are only seen at much lower frequencies than other spirits**. However, I will insert another variation with the abyss behind/under Malkuth (The Earth) at the end of the paragraph to remind me of this doubt.

Intermezzo

Several references speak of a Deva and Asura war, of a difference of opinion, of **Asuras becoming more aggressive**.

If we look closely, with this first part of the Tree of Life lying down, we still find the **hexagon of Saturn and Israel**.

If we count the **personality archetypes** connected to Saturn, Jupiter, Mars and the Sun, we arrive at a **total of 7**.

Orion chased the Pleiades in Greek mythology. According to legend, Orion, a **giant hunter**, was in love with the **seven sisters**, the Pleiades, and chased them across the sky. The Pleiades, to escape him, were **turned into stars** and placed in the firmament.

Illustration 17: Photo credit: *Mysteries of Egyptian Zodiac - Zodiac of Lower Athribis with the planets of the Summer Solstice in Blue. While the Constellations in Red. The giant man with his hand raised would be the hunter Orion. - Taurus sitting with '5-pointed Star' on a kind of boat. (the 'boat' is reminiscent of something carrying someone like 'a chariot').*

Those seven sisters could be those seven personality archetypes.

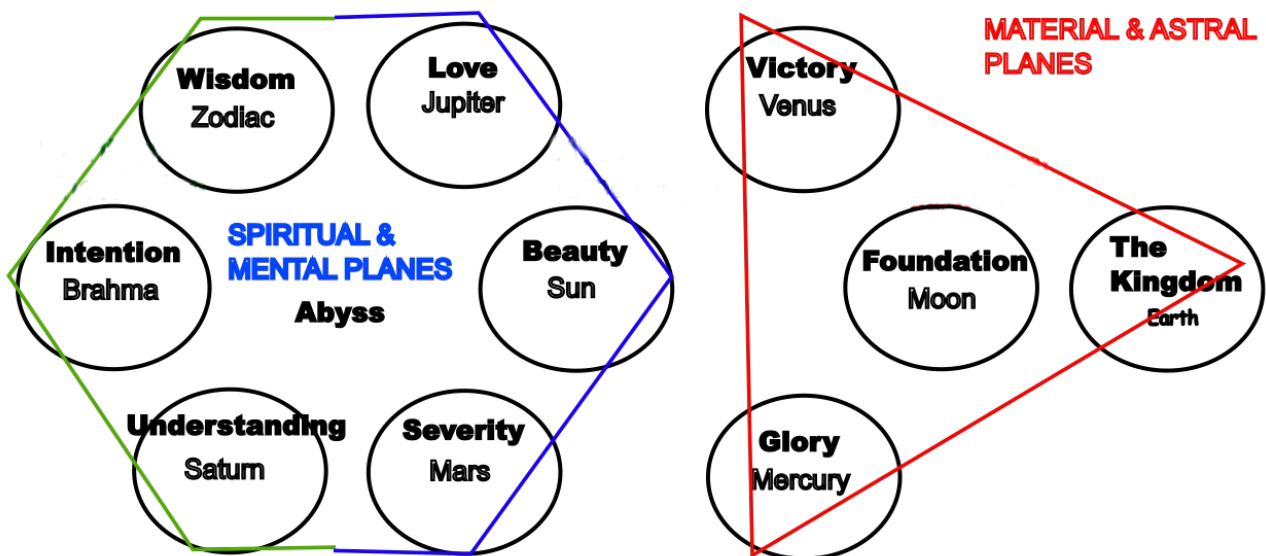

Illustration 18: *Creations with Abyss at the Centre - Spiritual Plane Vs Material Plane*

With this organisation of the Sephiroth, we also see a **contrast between planes of existence**. It could be that the **creators of the original zodiac**, as I already mentioned when I simulated the

"**descent of the Ego**", belonged to the **mental-spiritual** planes and were able to assign ethereal attributes to the unborn humans according to their **coordinates in space-time**.

While in a second creation, the one marked by the red triangle, the process may have been slightly different.

In my perception, from the readings I have done (Qabalah, Veda and Buddhism), in these mental-spiritual planes one moves **without form**. So beings (potentially even human beings) are in energetic, ethereal form, with no connection to the body (they are visible/palpable at **very high frequencies** or at least different from those that allow us to see the forms and substances of the material plane).

In contrast, in the **material-astral planes**, one moves with the **physical body** or with the **ethereal projection** of the body itself, also combined with the spiritual form. **Dreams are part of the astral plane**.

It may be that **through chips** or other modalities, certain individuals of some extra-terrestrial species can **connect to our minds** both **while we sleep and while we 'live'**

In everyday life, they will use the container as an amusement, a pastime or something else and intervene directly at will.

In the dream, they will use what in the film Matrix is called the '**residual image of ourselves**'. (this part of the 'dream' with the residual image is my speculation on which I also invite myself to reflect) This is how, at the moment, I perceive these **planes of existence**.

I spoke of **contrast** because **Orion, the hunter of Orion**, is also associated in myths with the archetype **Scorpio**, which is the emblem of **sexual perversion**.

There are some interesting myths in this regard and I mention two of them to give strength to this association.

An Italian psychotherapist and astrology enthusiast, Federico, mentions this myth when talking about Scorpio:

First Myth: *The Scorpion dates back to the Sumerians. The **myth of Orion**, the image of the giant Huntsman, was punished by the gods because he had chased **a host of maidens**, The **Pleiades**, for 7 years.*

One day Jupiter was with Neptune and Mercury, and they decided to pay a visit to King Erius who was in his palace in Tanagra. They ate and drank among themselves and did not know what to do.

*Jupiter had a brilliant idea. **Why don't we all masturbate together?** Neptune with his trident replied of course!*

*Why don't we put this **Seed** inside a **Sacrificial Bull**? Mercury did not want to be outdone; Father, Uncle why don't we put it in the ground after we've done it?*

For King Erius it was a brilliant idea. From there **Orion** was born.
(who fell victim to his violence and perversion)
Orion became the great hunter."

The second myth is offered by artificial intelligence.

Second Myth: 'The myth of **Orion** is one of the most fascinating stories of Greek mythology. Orion was a **giant hunter**, known for his extraordinary strength and beauty. According to different versions of the myth, he was the son of Poseidon, the god of the sea, and had the power to walk on water.

Orion fell in love with **Artemis**, the goddess of hunting, and together they spent their time hunting in the woods. However, his **arrogance** led him to **defy the gods**. In some versions, boasting that he could kill any beast on Earth, he drew the wrath of Gaia, the goddess of the Earth, who sent a scorpion to eliminate him. In the battle that followed, **Orion and the scorpion** faced each other, but **both were eventually placed among the stars.**" - AI 2024

From this association between some Reptilians and the Scorpio archetype, I can speculate that in the first archetypal creation, some Reptilians/Asuras were reflected in the **Mars archetypes** and thus **Aries** and **Scorpio**. Mars represents **Strength and Severity** which is certainly in line with these Sauroids who I think attacked me.

In the first myth quoted by 'Federico,' we also see the myth of **Prometheus**. "**Jupiter**" putting the seed into the **Sacrificial Bull** signifies a God who wants to put his power into humans. (The Sacrificial Bull is reminiscent of the White Bull in the book of Enoch (and in Egyptian art), who was the son of man, Adam, the prophet)

We continue the **speculation of the two creations**.

The Second Creation

Dion Fortune, in his book 'Mystical Qabalah' writes that the Leviathan dragon (Leviathan) (dragons and Sauroids are similar in aesthetics, we may still be talking about the Sauroids of Orion) sprang up between the Sun and the Moon and then said '**beyond that, one could not go**'.

Combining the aforementioned elements, it could be that some of **Orion's Sauroids**, already part of or participating in the original creation, later intervened in the creation of other personality archetypes, those

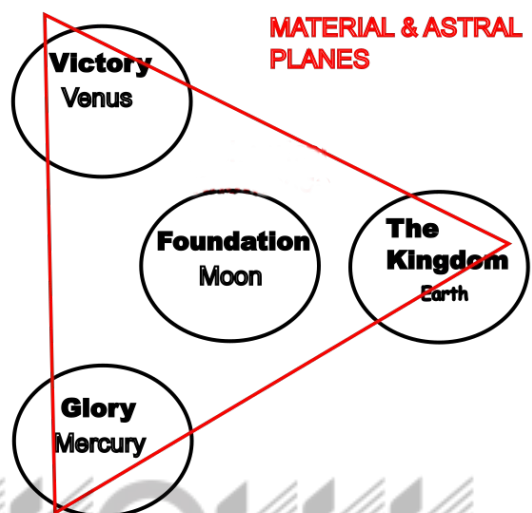

Illustration 19: Second Potential Archetypal Creation

relating to **Mercury, Venus** and the **Moon**.

Probably because some did not feel properly represented in the original simulation or for other reasons that I will speculate on shortly.

If this **matrix of personalities and spiritual-instinctive influences** were in place then it would mean that we too would be **Deva** and **Asura**.

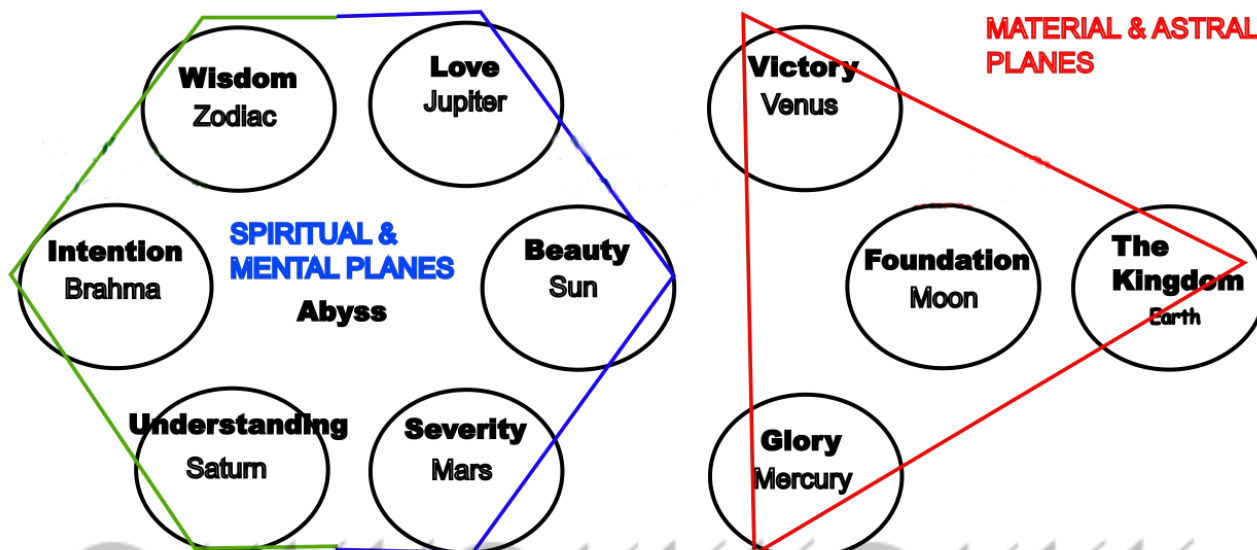

Illustration 20: Contrasting Spiritual/Mental Plan Vs Material Plan

The Deva, humanoid demigods, **who are also us humans**, have qualities, vices and virtues similar to those attributed to the **Jupiter, Mars** and **Sun** archetypes.

So they will be ambitious but ethical, they will have a better overview, they will tend to have more energy, and they will be more courageous, generous and sometimes proud.

While the **Asuras**, humanoid demons, including **Reptilians** but **also us humans**, have qualities, vices and virtues similar to the **Venus, Mercury** and **Moon** archetypes.

They will be ambitious to the detriment of ethics, very sensitive to appearances, some with more testosterone, more nervous and with the vice of abused love; others with more fluctuating energy and at times childish, and proud; finally, all these archetypes will tend to learn faster than the archetypes of the Ethical triangle.

In this group, some will need energy converters. (Moon archetype, living from the **light reflected by the Sun** and associated with Cancer, often with oncological diseases and thus more inflammation)

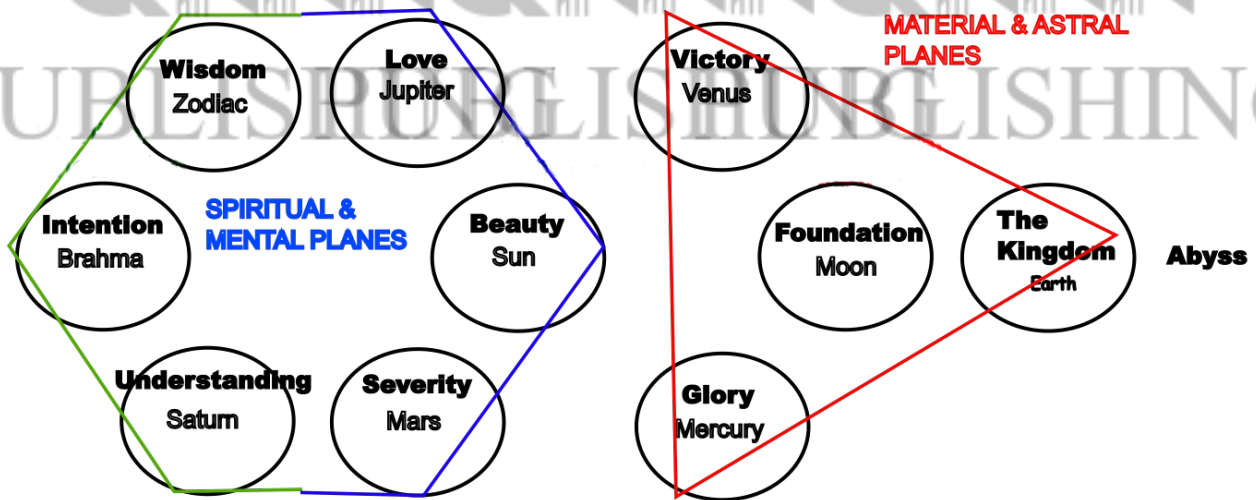

Illustration 21: Archetypal creations with Abyss in a 'low' position

The Serpent's Ego

How do reptilians represented by the 'Serpent' archetype think and feel about reality?

- We know that the **Reptilians are part of the Asuras** or at least a part of them, and therefore similar to the **Venus, Moon and Mercury** archetypes, but also connected to **Sirius (Knowledge)**.
- We know that the Serpent is the one who **stands between the Sun and the Moon**.
- We know that the **Serpent in America has its teeth where the Sun sets**.
- We know that **the wives of prophets or Brahmans** are often **violated** or even **'terminated/killed/liberated'**.
- We know that the Inca temple **Coricancha** tracked **the evening star and the morning star, or Venus**.
- We know that four of the most famous monuments pointed to **Atlantis**, creating a correspondence with **Orion's Belt**.
- We know from Malanga that some of the protagonists of abductions are **Sauroids (Reptilians) from Orion, Orange (I think dark-skinned reptilians) and Lacerta (reptiloids)**.
- We know that I likened my attackers to **Agent Smith from the Matrix**, who I think are related to the **Serpent and the Sauroids of Orion**.

It is plausible to conclude that as far as the Human Project is concerned, the **'Serpent' archetype**

has always consisted of some Reptilians and these Reptilians in general have been here for more than **700,000 years**. (the presumed dates of the monuments of Mesoamerica)

In the **first archetypal Creation**, it could be that the Ego of the Reptilian participants was represented by the **Mars** archetypes, hence Aries and Scorpio. Or perhaps by Scorpio alone, with the **Martians** represented by Aries.

However, as mentioned in the '**Descent of the Ego**' in the Tree of Life Chapter, it may be that some of these Reptilians brought knowledge to the planet to find **solar energy converters** for **fun** rather than for any particular reason.

Because of their egoic profile, where the '**Scorpio**' archetype is also synonymous with **possessiveness**, their way of bringing knowledge to the planet will have been through **pyramid** schemes.

Thus **restricting knowledge to a few and extending life to a few**.

Then there was the **Deva and Asura War** around 15,500 - 20,000 BCE and around 9500 BCE Atlantis seemed to disappear overnight.

These events could mark a very bitter **quarrel** between **two different species from the same galaxy**, i.e. both species from **Orion**.

This is evident because **Atlantis is linked to Orion** by the pattern created by drawing straight lines from the four most important monuments in our history. (indicatively)

After this event, **Religions** arose and **the mystification of ancient texts** began, including **the obfuscation of the Atlantis story**.

The reasons for this divergence could be that **some of these Reptilians, including some Sauroids**, started to use **the pyramid method** described in Corrado Malanga's books for themselves rather than for the Pharaohs alone.

Another reason may be related to the **prophets**. As I said in the introduction, the prophets, i.e. the **Capricorn, Aquarius Ascendant and Leo Descendant** have a particular ethereal body attribute. It looks like a **black hole** or something like that, something **spiritual**, but it could also contain special **functions**, such as it could act as a '**black box**'. Since Corrado Malanga speaks of abductions of '**original**' people and speaks of certain methods used to transfer/empty people's ethereal bodies, it may be that **some of these Reptilians or Asuras** tried to extract this ethereal part from some Prophets for a certain period in history.

Precisely because some, being very possessive and testosterone-rich, **did not want** or **do not want to confront the 'Prophet', a poor human being**.

This, however, seems necessary for the current system of consciousness.

In any case, this way of absorbing energy may have **increased the aggressiveness** of some of these reptilians (there are also insectoids and 'bodiless' in the team mentioned by Malanga) and also resulted in their **sterility** (Malanga speaks of aliens often looking for children, several abductions seem to confirm this argument, including today in North America).

Considering that we are talking about **beings with greatly diminished 'positive' feelings compared to humans** (with more testosterone, more nervous and no perception of ethics), a further thinning of emotional/sentimental sensitivity may have led to a **neurotic increase in competitiveness** and to truly off-limits situations (such as those described by Biglino's Bible) **This period I am describing could be between 8000 BCE and year 0.**

In this regard, I think of the **Sauroids in the animal world**, which are **lizards**, and my own recent experience.

*Yes, lizards belong to the **sauroid group**, which includes all lizard-like reptiles. They are a subfamily of scaly reptiles and are part of the order Lacertilians. - AI 2024*

*"Males defend their territory and **furious fights rage** between them **to win a female**. Only **after furious mating fights** between males and females do the latter lay eggs. (Lizards are oviparous)" - Luciana Bartolini*

It could be that some of these **Sauroids (Reptilians)**, who, as we have seen, may have been here for almost a million years, moving, as in my case, through chips and "active memories" in other humanoid bodies to comply with the **now obsolete consciousness patterns of this planet 'Earth'**, have developed a strong **sensitivity to the fascination of the human body or our sexual energy**, female as well as male for example. (depending on their orientation) And being **very competitive** by nature, given the nature of lizards, some may even have developed a **sense of competition** with other **species in their galaxy**, such as **with humans themselves**.

I remember reading somewhere that **Asuras** often had a **difficult relationship with male Rulers**. And similar '**I'm the most macho, I decide**' style behaviour I perceived during the attacks I received (messages from users, articles with words and threats using words used in private conversations, etc etc).

This would explain certain situations described in the past and also the ease with which **prophets and their wives would be persecuted**.

Ease that with time also seems to have become a **tedious and neurotically done task**, at least for some of these Reptilian members of the 'Snake Squad'.

Just like the caricature I referred to as the **second 'Agent Smith'**.

*Reference*₂₈: But let us come to the crux of this book. From my point of view, there is **no way** that any Reptilian or its soldiers, who have probably been interested in **planet Earth for a million years**, would intentionally choose to want to chip my best friend to 'potentially' abuse her and insist on months (years now) on **playing mind games** or **zeroing in on my business**, simply because they were bored or because they thought I was sufficiently stupid or intelligent.

What they were looking for and what they found as 'good hunters' was the **Goat, Ascendant Aquarius, and Descendant Leo**.

They wanted to trigger the '**Vision of the Harmony of Things**', chipping **the Goat** and chipping '**Trinity**'.

If this reasoning were true for **two archetypes**, I see no reason why it could not be true for **all other Zodiacal archetypes**. Since the correspondences between astronomical, astrological and Kabbalistic simulations with the **Egoic specifications** of us humans are remarkable.

This is an **important** first argument for claiming that human beings have been used by different alien species for **simulation**, as well as for **necessity** and **entertainment**.

When I was attacked and thought that my colleague **might have been chipped and abused**, as I already knew **abductions** and similar situations from **ancient texts** and from **Corrado Malanga**, after a short period (3 months) of '**semi-depression**', I had brief flashes where I saw dead/dead bodies (I think they were Reptilians). I also had a third one but that one I think it was my mind that created it and does not deserve to be mentioned.

From these visions I received a lot of strength (I could see my life falling apart and I thought, there are two of us now), this allowed me to think constructively.

So I wondered **if I could do the same thing with them** or with other humans or reptilians for example.

I mean, chipping a person, potentially physically/sexually abusing them and then dulling their memory. (physical/sexual abuse is a **hypothesis** due to the historicity of these interventions on Brahman and Prophets but also other abductions; **I have no certainty about this**)

The whole process underway could simply be a **collection of electromagnetic impulses** that never resulted in anything definitive in practice. (otherwise, I would be dead or there would be more obvious signs).

In any case, this question was enlightening for me.

So putting myself in the shoes of this '**Serpent Squad**', who would seem to do these things out of some sort of **conscientious agenda**, I observed that **Venus' vices** are substantiated by '**abused love**'.

Mystic Qabalah (Dion Fortune):

EGO DIRECTION

VICTORY

Titles given in Netzach

Firmness.

Archangel

Grace of God

Mondano Chakra

Venus.

Spiritual Experience

Vision of Triumphant Beauty.

Virtues

Altruism - The quality or fact of thinking about what is good for other people rather than oneself.
The ability to polarise from the negative pole.

Vice

Infidelity, Lust (**abused love**).

Table 3: Venus Triumphant Beauty

From my astronomical analysis I extracted these traits (these are from Libra, for Taurus, they are very similar):

Negative	Neutral	Positive
<ul style="list-style-type: none"> • Being proud • Being watched or the centre of attention. • Appear the smartest of the bunch. • Being intolerant of weaker or aesthetically unkempt people. • Possessiveness. • Arrogance x2. • Touchy. • Anger, violence and destruction. • Being overbearing. • Being blunt or very blunt, vindictive. • Keeping strong impulses to negative feelings at bay. 	<ul style="list-style-type: none"> • Satisfying a good sexual desire. 	<ul style="list-style-type: none"> • Being 'smart' • Being generous • Being conservative and optimising

Table 4: Venus Positive, Negative, Neutral

This made me think of the film 'Eyes Wide Shut' and also of an experience with another friend of mine, also a Libra, like the friend I mentioned in the introduction.

In the film, we see how the woman, Alice, with her intense, provocative storytelling and a certain expressiveness, **hurts the pride of her husband**, Dr Harford. Maybe by saying things in another way, she would not have hurt him. I cannot say she was a 'Libra' but I want to mention this association with **Wounded Pride**.

Once I went on holiday with my girlfriend and a friend (**Libra**) and his girlfriend.

I remember this friend of mine had an **attitude**, in my opinion **inappropriate**, that annoyed me, He **tried on the costume** and asked my companion if it fit him well, but in asking him she practically **put his 'member' in his mouth**.

He did this in front of both me and his partner.

I remember that he later told me that **his partner**, for some unspecified reason, **had not had sex with him during the holiday**. Maybe he had bothered her too, or maybe it was for another reason.

I'm just trying to say that the **Venus archetype**, given as the '**mentor of demons**' in the Vedas, needs to be smart or feel the smartest, to hunt and **abuse love**. Just as the Qabalah indicates for Venus.

The Taurus archetype also does similar things but with less 'predation'.

I know of two **Taurus archetypes**, wonderful people, always related to **Venus**, who briefly had their feet in two shoes (two romantic relationships).

I know of another **Taurus archetype**, again Venus, who at the table of a Catholic Wedding, sitting with the bride, expressed her belief that she was against Catholic marriage in a rather passionate/emotional way, perhaps inappropriate in that context. (clearly my perception)

Hence, **Venus-related archetypes** have this attitude of manifesting opposition to certain values, dogmas, and arguments in a very assertive/disguised manner precisely to confirm 'their own' values and maintain a '**winning level of competitiveness**' in their minds, even by 'voluntarily-involuntarily' **wounding the pride of others**.

It is very easy that for Libra archetypes, especially in the male, certain instincts will become betrayals.

We have seen in **Vedic Astrology** that if **Jupiter is the guru of saints**, **Venus is the mentor of demons**. "*Venus represents love and beauty, but is also associated with a form of seduction that can subjugate individuals to **demonic powers through sexual allure**.*"

The Qabalah confirms the same because the vices **Venus** tends towards are **Lust** and **Infidelity**.

That is, every **personality archetype** has instincts that lead to hurting others, but these that attack the Prophets, i.e. the **Serpent and thus certain reptilians, including some Sauroids**, seem to correspond to the **Venus-Libra but Sirius-based 'Daath' (lack of ethics) archetype**.

From **astronomical analysis**, we saw how Venus has a thick, dense atmosphere with acid storms. From this, I derived **possessiveness** and **arrogance**.

Arrogance can also be acidity and determination in expounding one's view on a subject, but the reason for this way of exposing oneself lies in the need to put things right in one's mind. (relating to the Libra archetype)

The planet is the **Evening Star** and the **Morning Star** and wants to steal the Sun's place.

Hence I said that they need to be the smartest, to be **predators** (more testosterone - nervous and touchy like Agent Smith).

Therefore, certain individuals/archetypes are prone to play these kinds of tricks or simply desire the woman/man of others precisely because **they tend to have more testosterone**, more instincts, more sensitivity to symmetries, aesthetics and consistently fewer ethics.

At the same **time** t, their instincts will go beyond friendship or ethical-sentimental bonding and they will be more prone **to hurting the pride** of those around them, especially in contexts of fulfilling sexual desires/instincts.

In my latest experience, the **Libra archetype** mirrors **the Sauroids of Orion**, with the difference that these Sauroids of the '**Serpent Squad**' have the gift of knowledge and seem to have no perception of ethics.

Another noteworthy thing of which I am sufficiently certain is that **the Prophet archetype and the Libra archetype are often destined to meet and separate**. Just as mentioned in the introduction to this book.

I remember seeing a cartoon about **Moses** and the liberation of the Israelites from Egypt where Moses had a very libertine, fun-loving and carefree friend, typical of the **Libra archetype**, but at a certain point Moses realised the injustices suffered by his people and, after killing an Egyptian who was mistreating an Israelite, he fled into the desert. and so he separated from his friend because he **needed solitude**.

This fact unbelievably parallels part of my story, the difference being that the Serpent came after me and not me.

Types of aliens						
Name	Skin colour	Eyes	Height	Fingers	Skull	Notes
Sauroids from Orion	The skin is wrinkled: when old, it appears to have scales. the skin appears moist, typical of an amphibian.	They are slit-like from yellow-green to bright red, depending on the mood. There is a sub-palpebra running from the inside to the outside of the skull. (Pterygium).	Two metres eighty at least.	Five fingers plus an unguulate rostrum. The fingers are palmate.	It has three horny expansions of which the central one continues as a pronounced sauroid spine and ends in a squat but long tail.	Under the eyes there are very pronounced cheekbones as in a lizard's snout. In the soft tissue areas one can see the sap flowing, dark red or bright red.
Grasshopper, from ACO 117.	Green-brown.	Dark eyes, elongated backwards and upwards, very developed.	Two to four metres, depending on whether in a crouched or extended position.	Three fingers that seem to be able to grip something in the upper limb.	Almost triangular, Mantis-shaped.	Lower limbs tend to be folded but the 'knee' never exceeds the height of the back. The upper limbs are in a 'prayer' position.

Table 5: Sauroid from Orion & Grasshopper from ACO 117 - Photo Credit: Corrado Malanga - Aliens or Demons

Corrado Malanga often speaks of the Aliens, saying that they are **egoic**, and **macho** and have only the male part of the self. He speaks of the Sauroids of Orion as homosexuals.

Also, according to him, the giant **Grasshopper/Mantis from ACO 117** (not too far from Orion), is linked to **Israel** and thus the **Hexagon of Saturn** and is higher in ranking concerning other aliens. I will mention it in the next book.

Anyway, in my simulation, I do not have any reference other than Malanga's book about this so I'll keep thinking that "**Sura**" are the **first creators of the Archetypal Zodiac**. (if it truly exists)

He also says that Deva and Asura are the same or similar in their orientation towards mankind.

In some terms, I agree with him, **in others less so**.

In my opinion, the **Deva or Semi-gods** would be part of the **Suras**, benevolent beings and probably among the first creators of the archetypal zodiac, while the **Asuras** comprise beings with **malevolent tendencies and different energy needs**, possibly the 'integrators' of the first archetypal creation.

According to my experience, too, some Asuras have only the male part of the self and tend to be **masculine**. Basically, they have more testosterone and less emotional sensitivity (especially the sense of affection and love). This characteristic of machismo, too, I think, maybe partly typical of **Libra archetypes**.

It should also be noted that if there has been no attack on planet Earth by extraterrestrial species for thousands of years, one of the reasons may be precisely **the influence or control of these Reptilians or Sauroids on planet Earth**.

Among the Reptilians, Malanga also mentions **the Lacerta** (from Shaula or Berion), '**anthropomorphic reptiloids**' with a hint of a tail, whose skin is composed of iridescent scales, and who have nothing to do with the Sauroids, of whom they are the **arch-enemies**.

I quote Malanga to say that **I don't know anything about Reptilians and every single Reptilian will have a different ethic**, just as every single human **will create his or her own perceptions beyond the mental-instinctive archetypes that make him or her up**.

I am talking about those who attacked me who are certainly among the contributors to the development of human beings and certainly participate in the '**Consciousness System of the Kingdom (the Earth)**'. (since, from my point of view, they have been **doing the same thing for 5,000 years**)

With this reflection/simulation I am making I conclude that some of the Reptilians who have contributed to the development of our civilisation but especially to this simulation or matrix of personality could be represented by the zodiacal archetypes of Venus: **Libra, Taurus**. (and originally from the **Scorpio** archetype)

Thus, they would have **a lot of testosterone**, love **sexual energy**, tend to be **masculine**, very **curious, intrusive, possessive, sensitive to aesthetics, sensitive to symmetries** and do **not perceive ethics** or otherwise **have no feelings** (or if you like, have **feelings/emotions that are less binding than their instincts** based on **form and energy**).

These characteristics would be partially shared with those spirits described by Buddhism as '**hungry spirits**', which I have associated with the **Abyss** in the descent of the Ego (Qabalah).

This description concerns the **combination of Venus and Sirius** or (Daath, which is never shown on the tree)

In the introduction, I compared them to Agent Smith precisely because their **anger** and sometimes **the desire to hurt me** shone through in their messages. (clearly, in the case of this **prophet-serpent encounter** they will do more than what they would do in a normal confrontation situation, but it is

certainly **natural for them to do so, I did not perceive any pretence**, in fact, I was very afraid)

It seems that **indifference** is the thing that makes them stop stressing souls, just like **children** or **teenagers**.

This makes me think of the **Moon** and thus of the **Cancer** archetype, sometimes childlike, the child of the zodiac, but probably also the archetype with the **most fluctuating or lacking energy**; especially with advancing age.

This is another element that makes me think that the Reptilians, linked to the **Astral Triangle**, brought knowledge to the planet for **energy matters, precisely to find/use solar energy converters**.

There are also some newspaper articles about more or less conscious **collaborations/adductions**, even with famous people. They even seem to use humans for military exercises or intergalactic wars.

*"And he says he saw **Robbie Williams**, who was part of his 'military unit', on board the alien spaceship.*

"I'm in a military unit - on a mission. He (Williams) is behind me. We had helmets on. I was ready for the mission.

*"I looked at him. It must have been 'leader one'. I said 'Don't I know you from somewhere? Robbie Will...?' An **alien** then shouted 'get back in line'," says Russ204. "*

The Puranas speak of the clans' *nagas* and *uragas*; I have not delved into the information on these clans but they could be the **Sauroids** from Orion and the '**Orange**' from Sirius/Constellation of Taurus mentioned by Malanga.

Sirius and Taurus, are associated with 'Daath' knowledge and Venus (**Astral Triangle**) respectively.

The **Sauroids** would seem to be the more predatory and nervous ones and therefore **Libra**, Malanga's 'Orange' or another species of Reptilians might be more balanced and could be represented by the **Taurus** zodiacal archetype.

I mentioned the 'Orange' (fictional name I presume) because I remember they have dark skin and in some films where **Jesus was tempted by the devil**, a being with dark skin and long fingers was seen. (indicatively the being described by Malanga, perhaps also about that being with the Freemasonry symbol (compass and compasses) on his suit who goes to pick up potential adducts)

This brings me back to the concept of the **Demon** and the **Qabalah** where the Sephirah 'Daath' is never shown on the tree.

These **Asuras**, or at least some of them, seem to take knowledge to other planets to find solar or other energy converters.

From the tree of life and my latest experience, I deduce that both Reptilians and 'hungry spirits' love **darkness** and **dislike light** (from some videos my colleague showed me).

But they love the energy of those who can absorb light. (from Tree of Life, Astral Triangle and

various newspaper articles and adductions)

Speculations on the Moon

The Moon represents the Cancer archetype and also 'The Chariot', 'The Chariot', in the Tarot.

"The Chariot" is a tarot card that symbolises triumph, control and determination. It represents the journey, both physical and emotional, and indicates successes achieved through will and strength of character. A confident driver holds the reins, symbolising the ability to govern one's emotions and face challenges with confidence. In a broader context, it may suggest the need to maintain a balance between conflicting forces and to advance towards one's goals with courage and determination." - AI 2024

Illustration 22: Photo Credit: The Pictorial Key to the Tarot by A.E. Waite (1910)

The name of this card, **the Chariot / the Chariot** refers to someone **carrying** a prince, the **Sun**, towards the weighing of Light and Darkness (the two sphinxes, black and white).

***Weighting** refers to the process of assigning specific weight to different elements or factors in an analysis, decision or calculation. This approach is often used to highlight the relative importance of each element within a broader context. - AI 2024*

Here, too, we have a Reference to the **Moon carrying the Sun** towards the judgement between good and evil, light and darkness.

In the chapter where I did the **astronomical simulation**, I talked about the Moon being an **artificial satellite** carried by Reptilians.

- *"Zulu tradition holds that the Moon is hollow and created by Reptilians and would have gone into orbit at the end of the Golden Age (11500 BCE - 6500 BCE according to Yukteswar)"*
- *Another testimony would come from the symbols carved on the walls of a garden in Kalasasaya, near the city of Tiahuanaco, Bolivia.*
- *"According to the Bolivian fragments, the moon would have appeared in the sky between*

11,500 and 13,000 years ago."

Thus, these two testimonies are **consistent with each other**.

Then we have **Stonehenge**, which, according to the Mario Buildreps Team, was a 'natural' device for measuring **lunastics** (the extremes of the Moon's rising and setting) at the specific latitude of Stonehenge 63.3° N, which was oriented with **Pole IV**. (which dates to about **240,000 - 270,000 years ago**)

Here we have a **mismatch** between the Zulu sources and the fragment of the city of Tiahuanaco in that it seems that someone was already measuring **the movements of the Moon 250,000 years ago**. But we have a further Reference to **Orion** and thus to some Reptilians. (the Sauroids) since Teotihuacan, Tiahuanaco, Stonehenge and Giza trace the route to **Atlantis**.

It could also be that 250,000 years ago someone was drawing **an early form of the Moon** as an **artificial satellite** and then brought in other, larger models. (ad Example)

Another less dilapidated Example recalls the vision of Kubrik's film '*2001 A Space Odyssey*'.

That is to say, the **Moon** could be a real satellite and therefore traced back as far as 250,000 years ago, to which someone later added something, a kind of '**Black Rock**' column, after the name of the American financial giant, which **connects to our DNA**. (small speculation)

Reference₂₉: However, there are **three different sources** from different times and places that associate the presence of the Moon, as an **artificial satellite**, with certain individuals belonging to the **Reptilian** species.

We have the **Leviathan Dragon** inserting itself between the Sun and Moon, where the **Astral Triangle** is formed; the Moon associated with the **Tarot Chariot**, which seems to lead the Prince towards the confrontation between **Light and Darkness**; and we have the aforementioned experience of **Capricorn** (First Decade - Saturn), Aquarius Ascendant, Leo and **Cancer Descendant** (Moon), Virgo Ascendant, Pisces Descendant (Third Decade - Jupiter) being attacked by the '**Serpent Group**' along the years **2023-2025**.

In the next chapter we explore what '**being benevolent**' and '**being malevolent**' can mean, the relationship between these attributes and **knowledge**, and the possible implications for the human being in the case of a **renewed understanding** of these egoic attributes given a **renewed Kingdom (Earth) consciousness system**.

Conclusions about 'Interpolation'

Considering all the elements taken into account in this book so far and **combining them by looking for logical and motivational sequences**, one concludes that the **human being**, despite being the **original inhabitant of planet Earth**, has been the **object of attention** by alien species, who have used him, without his knowledge, for a kind of **mental-instinctive-behavioural** simulation.

In this simulation, there appear to be **three different alien components**, the ego profile of which can be extrapolated by comparing **the zodiacal teams** that make up the **astrological enigma of the Vedas and the astral, ethical and superior triangles of the Qabalah**. The reason lies in the fact that although there are **3000 years between the two sources**, the planets of Reference are always the same.

From the **combination of other sources** and references, it is clear that '**Daath**' knowledge is attributed to the Asuras, the '**Hungry Spirits**' of Buddhism and the **Reptilians** (part of the Asuras). While the **creation of the archetypal Zodiac** and the **ethical triangle** seems to be attributed to the **Suras, benevolent spiritual beings**.

This archetypal simulation, which essentially defines a **personality matrix**, would lead each human being to **live a life according to precise perceptions of reality**, which correspond to the fulfilment of one's **spiritual-ethical-instinctive and physical needs**.

Clearly the question arises as to how this could ever happen given that **we are the children of human fathers and mothers, who pass on their values to their children**, and sometimes the children simply carry on with their parents' activities, passions or missions.

The answer to this question comes by considering the **media-coercive process** carried out by governments, the media and the internet.

Every piece of news, message, and coercion by any media agent represents an **electromagnetic impulse** to which our heart-brain, as the **electromagnetic centre of the human body**, **will respond mentally in different ways**.

This will lead **everyone**, despite belonging to the same species or even the same geographical areas, to **act differently**.

It is no coincidence that, even in families of criminals, there are often repentants or, in families of well-known industrialists or actors, there are suicides even though they may have had a very comfortable life.

These events, in some cases, can be explained by the **inconsistency** between the **ego profile of the person** (the children) and the **ego profile of the head of the family**.

At this point, the question arises **of 'how' to prove the existence of this matrix of spiritual-mental-instinctive influences** or this '**personality matrix**' of which humans would be

'experimenters' unaware.

This is where my recent experience of **attempted abduction**, which has now become many years, and the recurrence of the same concepts and **experiences** by the prophets and Brahmans **of the Biblical** and **Vedic** texts come into play.

From numerous passages in ancient texts, from the **art of ancient peoples**, from the **Tree of Life** as known around **1500 CE**, and from the **filmography of 1999 CE**, it is clear that this matrix of influences is governed by what I have called the **'Kingdom Consciousness System'**.

This system provides for **the unlocking of certain information relevant to the entire system** (the Kingdom - The Earth) only after **the clash-meeting between the 'Prophet' and 'Serpent' archetypes**.

The **'Serpent'** or **'Serpent Group'** archetype is represented by **some Reptilian species** including the **Orion Sauroids**, who have the gift of Knowledge - 'Daath', which allows them to be able to alter the system as they wish, regardless of the technological development of the Reference period (also because the level of technological development of planet Earth is probably determined and/or coerced by some of these species).

They are probably among those who created today's society and which we all know today.

These Reptilians also collaborate with the **'Hungry Spirits'** as they seem to share similar energy needs and similar negative character components. (such as **strong pride, strong possessiveness, and the need to be the smartest**).

The archetype of the **'Prophet'** is represented by the zodiacal combination **Capricorn, Ascendant Aquarius, and Descendant Leo**.

There may be **different prophets** depending on their exact zodiac combination (e.g. by combining it with the 5 elements or as we will see in a future book with the Tarot).

The **prophet par excellence** will be the one belonging to the **first decade** because it is the period with the **least light on Earth**. It is those archetypes represented by religions such as Buddha, Jesus, Ezekiel and others that probably no one has ever made famous.

This meeting between the Serpent and the Prophet will be made possible by the **archetype of the Trinity**. That is, a **person who will fall in love with the Prophet** and with whom the **Prophet will in turn fall in love**.

This **very intense union** from a mystical-alchemical point of view will lead the two to isolate themselves to live out their feelings privately (which could easily **generate envy or jealousy** among those around them).

In **experiencing solitude** and in comparing his perceptions with those of the Trinity archetype, the 'Prophet' will acquire all the necessary information to be able to arrive prepared **for the attack of the 'Serpent'**.

The **'Serpent'**, in the present day, would be represented by Agent Smith in The Matrix, i.e., through

the internet, chips, active memories and collaborations with 'bodiless' spirits, **he will be able to gain control of any human being without the human being noticing.**

The first objective will be to close the "**Prophet**" and the "**Trinity**". He will then be able to see and hear everything the subject sees. He will also be able to **alter his thoughts** and put things in his head that are contrary to the subject's original ethics or **take him on journeys that the subject never** dreamed of or simply **engage in NLP-based discourse** that the original subject would not even dream of.

Although the methods today would seem much more technological and sophisticated, the approach would remain the same as thousands of years ago.

To debase, to humiliate **the Prophet** as to addict, to **bewitch him and his companion** or those closest to him (to the point of even leading to their **sacrifice**, particularly that of the archetype of the Trinity).

This process has been the same for at least **5000 years**.

It is described in Vedic texts, it is described in Biblical scriptures, and it is depicted in the 1999 Matrix film.

This type of attack seems to have several purposes including to **test whether the Prophet knows he is the Prophet as well as to make the Prophet himself 'lose his mind'**.

The reason this happens seems to be a confrontation, whether real or fictitious, between **the creators of the archetypal zodiac based on the mental-spiritual planes of existence** and the **creators of the Astral Triangle archetypes based on the material-astral planes of existence.**

As, historically, this process performed by the '**Serpent's Team**' often leads to the **abduction of the Prophet's companion** (with potential physical-sexual abuse), in my case my colleague had 'very dirty' dreams shortly before being contacted by a representative of large technology companies, as well as the death of people close to the Prophet or the sacrifice of the Prophet himself, together with other elements, I was able to identify some of these Reptilians as the **Sauroids of Orion** and how these, together with other Reptilians with this task of 'testing' the prophet, could correspond more significantly to the **zodiacal archetypes Libra and Taurus** as well as retaining all the characteristics relating to the component archetypes of the 'Astral Triangle' but especially **Sirius - 'Daath'**.

This led me to identify another **archetypal cycle** that is embodied in the **encounter-separation** between the **Libra archetype** and the **Prophet archetype**.

These two archetypes seem to have a certain attraction to each other, but at some point, they will separate precisely because of the **difference in their perceptions** and attitudes towards everyday vicissitudes. One particularly intrusive and the other in need of privacy, especially during the construction of the person and life experience.

The **evidence of this conscious system** through the observation of the **cyclical nature of this Prophet-Serpent clash** turns out to be the **first and important piece of evidence** that alien species residing on **mental-spiritual** planes (thus without form and space-time) and alien species utilising **the material-astral** planes, also through imprints, in the space-time dimension using technology

and the internet, how potentially also with the support of instruments on artificial satellites (such as the Moon), have utilised, exploited and aided **the development of the human being for an archetypal simulation** using the characteristics of the planets of the solar system to potentially represent **the characteristics of their species** and reflect them in human beings.

From this evidence, it is clear that **the apex of the clash between good and evil is manifested in the archetypes relating to Jupiter and Venus** because it is in these archetypes that the instincts of **predation** and **possession** are manifested.

Finally, what is described in this chapter shows how religions and certain knowledge systems related to spirituality are partly **dogmas and conceptual prisons** based on the mystery of the afterlife, but also sources of **conceptual and symbolic truths** that decrypt the '**conscious system**' based on **five planes of existence** (one of which is not manifest).

CHAPTER 14

Conclusions

This journey or reflection I have made with you leads me to **three concluding remarks**.

1. **Homo Sapiens** is the native inhabitant of planet **Earth**. Its composition and **DNA is linked to the Sun**.

He has probably been here since the dawn of time, and expert researchers point out that one can find evidence of Homo Sapiens civilisations **as far back as 50,000,000 years ago**.

At the same time, it seems that alien species far more advanced than us have been on this planet for at least 700,000 years. There seems to be an important link between the most impressive historical monuments, **Orion** and the famous **Atlantis**. It is plausible to think that there was a **clash** between two different species from the same galaxy, namely the galaxy of Orion. This is because a series of events including a famous **war between Deva and Asura** around **20-15,500 BCE**, the **disappearance of Atlantis in a single night** around **9500 BCE**, the **Bharata War in 3138 BCE** and the adoption of the **Solar Calendar** with the **date of Creation of the Maya in 3114 BCE** seem to be events related to the same diatribe over the **conscientious organisation of planet Earth**.

Shortly thereafter **Religions based on the Sun** were born through the **mystification of the Vedic knowledge** and **Biblical events**.

Thanks to my latest experience as a victim of **cyber attacks, insults from anonymous users** as well as **control chips, possessions and abductions** by my **family members** and **people I love**, I have realised that the **Prophet's archetype** is represented by the **Zodiacal combination Capricorn, Ascendant Aquarius, Descendant Leo**. Linking this intuition to the ancient texts, the **Jewish Qabalah** and the **filmography of 1999**, I realised that one should speak of "**Chosen Ones**" instead of "Prophet" or "**Chosen One**" only. That is, of the **Holy Trinity**. He who is identified as a prophet will mate or spend much time with the archetype of "**Trinity**" represented by Cancer, Virgo Ascendant, and Pisces Descendant. At some point in their lives, they will be challenged and tested by the '**Serpent**' archetype, a role played by a group of individuals or soldiers who also include individuals belonging to the **Reptilian** species, including the **Sauroids of Orion**.

This process is palpable through various **monuments around the world**, through **ancient texts such as the Bible** and through the **filmography of 1999**. So we are talking about **concepts that have remained intact**, if not with a few variations, over the last **5,000 years**.

From my latest experience, I have been able to realise that this consciousness process is nothing more than an **artefactual, calculated process** to bring the person with the archetype of the Prophet to produce a **vision** that takes into consideration both the **egoic needs of the alien species that have taken an interest in planet Earth** as well as those of the **human**

being in the context today.

This conscious process of Maya's wheel (zodiacal illusion) seems to culminate with the sacrifice of 'Trinity' (Cancer, Virgo Ascendant, Pisces Descendant, third decade associated with Jupiter and therefore tending to the mental-spiritual planes) and the realisation of the "**Vision of the Harmony of Things**".

On this observation, I would proceed as follows:

- I would make this book known to **reach as many people as possible with a Leo Descendant in their zodiacal archetypal combination**. It does not matter whether you are rich, poor, generous, selfish, successful or not. You are likely **an unwitting victim of an experiment** by alien species far more advanced and experienced than us in both strategic-organisational-experiential and technological terms.
- I would develop **reliable tools to visualise** the attributes of any individual's **ethereal body** accurately; spirits, hungry or not, can certainly see these attributes as they move and live in the mental-spiritual planes and perhaps even help build these tools.
- **I would create communities, in each city, to meet and visualise, compare by non-invasive methods, the ethereal/energetic bodies of the various zodiacal archetypal combinations**, including Capricorn, Descendant Leo and Cancer, Descendant Pisces to see if there might be **similarities and repetitions** in the characteristics of these ethereal bodies. Taking care that the birth certificates are not falsified and the **subjects involved are not compromised** by chips or spirits during the tests or even already 'emptied-altered' before the tests. I would therefore consider a communal approach to the ethereal/energetic part of the human being and consider these places as **potential meeting places where one could see the work of the Suras** or the first spiritual creators (according to the theories put forward in this book) and even make contact with beings on different planes of existence. I would think of continuous and global promotion of meditative activities such as **Casteneda's 'Dreaming sessions'** and **Jainism's meditative method**, which focuses attention on a precise point, 'blurs' it, 'concentrates' it, allowing access to the **5 jhānas** or other **planes of existence**.
- Should there be a **conscientious agreement that directly or indirectly provided for the sacrifice or damage of one or more human 'containers' for any reason whatsoever, I would cancel such agreements completely**, considering that the Prophet does not choose and has no interest in being the Prophet, Trinity does not choose and has no interest in being Trinity, and no one, not even those who **fool themselves into thinking so**, should dispose of the life of a human container without the consent of the container's native intelligence. Which consent is not the consent of the "chip + active memory" or the occupying spirit. The individuals closest to the 'Prophet' as an exemplar of the archetype with positive feelings and positive feelings (which include affection and love), including women close to him, are **50 per cent of his Heart**. Who, among Suras,

Asuras and Superiors directly or indirectly impinges on the vessel of those close to the prophet's archetype or other similar archetypes for any reason will be responsible for the approach of unexpected happenings that will impact up to **50% of their species belonging** in case they cannot experience positive feelings such as **affection or love** while impacting the beings closest to them or their energy, in case these Suras, Asuras or Superiors can experience feelings such as **affection and love**. Those that have already negatively impacted someone's vessel for **reasons futile**, i.e. relating directly or indirectly to the conscientious agreement of the palaeozoic feared in this book, **have already brought misfortune to the species to which they belong**, whether with form or without form, but are not yet aware of it. This is what I have **observed, perceived and interpreted** from the visions following the chipping of my colleague and my family members and in which I have no responsibility or even interest.

2. Through a **process of personification of the Sephiroth of the Qabalah** (1500 CE), which **mirrors the Vedic Deva and Asura arrangement** (1500 BCE), I have been able to identify the groups of extra-terrestrials that seem to have **assisted in the development of human civilisations** as we know them today. Both contributing positively and negatively to our history. Using a modicum of imagination, **I observed the major planets of the solar system** from a morphological and atmospheric point of view and extracted **egoic needs to be those zodiacal archetypes that have historically been attributed to those planets**. I then **combined** them with **the conceptual directions, virtues and vices** attributed to these same planets by the **Jewish Qabalah**. This allowed me to understand the **ego profile** of both **humans and species** that have taken an interest in humans over the last **5,000 years**. It is impossible not to notice that **we humans have become a reflection of these species**, with their **needs, their vices and their virtues** (despite not knowing exactly who they are except a few references to Spirits, Reptilians and the Orion Constellation). **Interpolating the manifestation plans of the Sephiroth, the 'Conceptual Directions' attributed to the various planets, the information in the Puranas** (ancient Indian texts) and my latest experience as a **'Prophet'** debased by the **'Serpent Group'**, also considering the information provided by **various scholars** in different works, I have gained the perception that there are **two opposing poles of extra-terrestrials and a group acting as an arbitrator**, which could easily be the result of **an agreement between the two groups, Sura and Asura**. This potential third group (Brahma, Vishnu, Shiva) would be represented by the **zodiacal archetypes synthesising** the two groups and linked to **Saturn** (Capricorn and Aquarius). These creators appear to be the holders of the **first spiritual creation archetypal creation** and seem to speak to the other parts through the figure of the Prophets or Chosen Ones, who include in their ethereal bodies an attribute similar to **Saturn's vortex**. The second group, the **Suras**, are **spiritual beings** with no particular material needs but with **strong ethical-sentimental inclinations**, probably the creators of the first archetypal matrix while the third group, the **Asuras**, consist of **spiritual and nonspiritual beings**, including **Reptilians**, who would be fascinated by sexual energy in general and would bring knowledge to other planets because of their more complex **energy needs**. These differences also seem to be expressed, at least conceptually, in the type of **knowledge** mastered. To the **Superiors**, whom I have

not dealt with in this book and about whom there is little information that can certify their existence, I have attributed a **Spiritual Knowledge** (capable of attributing information content to ethereal bodies); to the **Suras** I have attributed a **Mystical Knowledge** (capable of ascribing information content to ethereal bodies to the human being depending on the space-time coordinates of the unborn child); to the **Asuras** I have attributed an **Alchemical Knowledge**, (capable of turning lead into gold, giving immortality, transform digital and material reality 'at will').

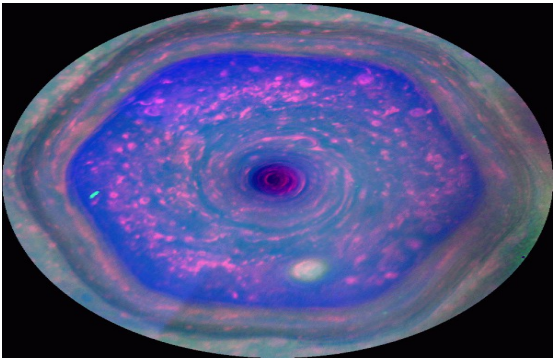

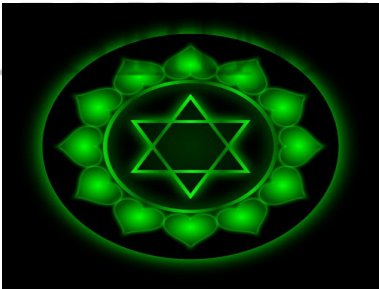

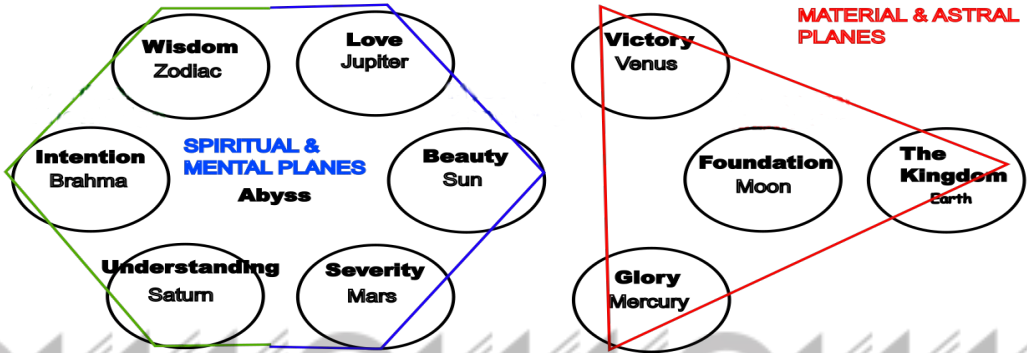

Hexagon of Saturn	
	
Heart Chakra	Star of David & Hexagon Israel
	
Spiritual Vs Material	
	

Table 6: Comparison Hexagons & Spiritual Vs Material.

On this observation, I would proceed as follows:

- I would reflect on the **ego profile** of each zodiacal archetype, especially the **vices of the Venus and Jupiter archetypes** as highlighted in this book to understand their nature and consistency with a predatory attitude characteristic of certain alien species, historically considered predatory, such as the '**Hunters of Orion**' and with a pontificating attitude characteristic of **Religious/Feudal Tyrants** (including the Catholic Religion with the Crusades) and the '**Serpent Group**' as indicated by my own experience in this book but also on potential **points of conceptual union** such as, for example, considering that a tyrant needs "**Love**" or a "**Kingdom**" to be a tyrant just as those who want to "**abuse love**" need "**Love**" to be able to abuse it.
- I would start an **investigation** into whether or not there is a real **opposition between Sura and Asura as far as the consciousness aspect of the human being** is concerned, who in my opinion needs **more independence** from any being who still claims to be the godfather of this species, which belongs to no one but **planet Earth**.
Above all, I would try to understand whether someone from the Asura group is not trying, **in an independent way**, to subvert the original creation by trying to **alter the mental-spiritual part** present in some of the archetypes of the original creation. However, if there were a simulation going on in the skin of mankind human race, then **all museums on Earth** should provide **basic information** about the species that participated in the creation and development of this **matrix of personality (Egotrix Matrix)**, be these species '**with form**' or '**without form**'.
- I would consider the idea that **astrology as well as religions** have been ways of **tracing and conceptualising** this **conscious experiment** done on **human beings** by certain alien species. It sounds particularly bizarre how one can extract personality traits characteristic of each zodiacal archetype simply by looking at the **morphological data of the various planets in the solar system**.

In this regard, I would complement the **Tree of Life** with a **Spatial-Dynamic Life Circle** as indicated in the previous chapter. It will allow a **continuous and direct exchange between all parties at the same level**.

In this conceptual circle:

- **The intention** would become **any form of Energy** related to the individual (**Biological, Creative, Ethereal, Sexual, Informational**) and could be expendable and shared at '**time t**', but always with **consent and awareness**.
- The **Zodiac** would become the **Standard Model** of particle physics, of which it is certainly an expression, but where the preponderant part is always the **Neutral** part (in

the case of **planets**, they will be the original inhabitants of the planet) and where **Negatives and Positives characterise the Neutral part** and present in an **explicit and balanced** manner.

- **Understanding** tends to be understood as **Cohesion** between the parts and where there are opposites, **points of union** can always be created, **where the egos of opposites move in the same direction**. From this simulation, it is revolutionary to understand **how to interact with the Asura group**, which also seems to be composed of individuals who are not able to dominate their **instincts** and **have no ethics** but are nevertheless capable of understanding rules, energy, life, death, intelligence and above all being endowed with **revolutionary knowledge** regarding the **material plane** as understood by human beings today.
 - **Knowledge** would become a **form of (Informational) energy** that acts as a **Stimulus** and **Support** for the participants in the game and envisages that 'sales' objectives would be replaced by '**experiential**', '**learning**' and '**sharing**' objectives respecting the mind and physical container/body of each individual.
3. Throughout this consciential process described in this book, regardless of the epochs or technologies of the time, there stands out what I have named the '**Serpent Group**', a selection of Asuras and Spirits, a kind of military commando, which has the role of '**finalising**' an **artefactual Consciential process**. That is, the process I am describing with this book and would be nothing other than the synthesis of the **Wheel of the Zodiac**, or the **Illusory Wheel of Maya**:
- There are biological machines (AI) and non-biological machines, soldiers or humans (exploited without their knowledge) run by **Reptilians and/or other alien species that are intimately familiar with the personality matrix described in this book and know how to play with the egos of humans**. Over the years, being the main purveyors of technology, they seem to have achieved **substantial control of the media** through chips and active memories and using the media and the internet they know how to create **electromagnetic impulses** through the news, such as the usual war between good and evil; Russia - America; Israel - Palestine; Big cities, big opportunities.
 - **Dangerous situations** and **economic instability** are created to **increase prices** (especially in city centres/large towns) and create a **difficult economy**.
 - At this point, to gain visibility one has to go through the **city centre** where **rents are stratospheric** or through **digital marketing** where everything is **monitored and under control**. This does not mean that a person cannot be successful online. I was 'successful' online until **five years ago**. This means that if you were a person, who for some reason was seen as an obstacle, your visibility would be hindered or wiped out by invisible

hands. **In short, there would be a lack of real freedom of expression and opinion.**

- Conversely, all this could be a **planned and calculated process**. Precisely the '**Kingdom Consciousness System**', a simulation.
- A **calculated Plan B**, based on strong coercion and bullying, is proven to **fail**. The **Covid** period was an example of this, now there is the '**Ban**' programme - i.e. making yourself invisible on social media and in newspapers; accompanied by **unjustified increases in energy costs and prices**.
- **The 'Prophet' is found, contacted and debunked**, who sometimes 'resists' and gives **Plan A**. And everything goes back to before. But the 'Prophet' goes to the cross or 'Trinity' leaves with the spirits or both or something like that.

This is evident if we look at the **abductions of the wives** of the Brahmins, the violations of the wife of Lamech, father of Noah, the stories of Jesus, Ezekiel, and Neo in the Matrix and my own experience described in this book, from a **conceptual**, archetypal point of view, and the interpolated with the **vices of the archetypes** belonging to the **Astral Triangle** and related to the Asuras.

It is equally important to note that in this process there is, in a way that **always cuts across the events of the last 5,000 years**, an occasional but constant mystification of sources and authors.

As already mentioned by several authors such as Corrado Malanga, Philip Coppens, Mauro Biglino, and Mario Buildreps many scientists are ensconced in a **mystified information system** but this process itself is not only the work of humans, it is also the work of **alien species** that assist this process according to their interests in human beings.

From my latest experience, I realise that **the difference between the human and the alien** concerns precisely the **mystification of the authors** as well as the sources. If a human being, for various reasons (usually economic), might be inclined to the mystification of sources, the alien individual, given his great knowledge in the field of biology and technology **will also manage to mystify the authors themselves**, precisely through **chips, active memories and the transfer of the host subject's memory/knowledge** to the alien memory controller. For instance, if Anne Frank were still alive, some Reptilian might be able to make "Anne Frank" write that Nazism never existed, so much that Anne Frank had no inkling that she had contradicted herself.

With the '**digital revolution**,' it is also immediate to change publication dates to blogs, pages, articles, comments and various digital documents, I have already noticed several mystifications referred to some authors mentioned in this book.

It is also very easy for **technology managers** to have certain pages found in search engines rather than hiding others.

Unlike the humans, the motivations for which certain individuals, 'alien' to Earth, (but not too "alien" considering what is shown in this book) would make certain mystifications are

instead to be found in their **Egoic profile** (some need to feel clever and successful, just like us humans) and in that process of **debasement and mystification of the "Prophets"** by the 'Serpent Group'.

From the observations made in this book, I have been able to extract, looking at the work of numerous scholars, not always publicised by the canonical media, a possible "**Consciential Chronology**" that makes sense of human vicissitudes also by correlating them with the potential creators of the Egotrix Matrix (Personality Matrix).

The **conscious chronological sequence** that would seem to make sense of what has happened on Earth over the last **25,000 years** would be this:

Period	Events
50.000.000 BCE	Homo Sapiens
500.000 BCE	Peoples and civilisations of the Earth in Mesoamerica, Mesopotamia, Africa and the Himalayas (Aryans)
15.500 BCE	War Deva – Asura - Possibile 20/25.000 BCE - Beta Yuga Yukteswar
Victory of the Asuras	
9500 BCE	Atlantis submerged by the waters in a single day.
6700 BCE	First Written Vedas
Victory of the Deva	
5500 BCE	Conceptual Birth of Religions and the Conscious Kingdom Control System (Sun - Path of the Gods + Saturn - Path of the Fathers)
3500 BCE	Polarity Reversal Indo-Iranian Vedic Mythology in Ancient Persia (Deva become Ashura and vice versa)
3138 BCE	Bharata War
3114 BCE	Date of Creation of the Maya - Adoption of the Solar Calendar
3000 BCE	Transcription of Formal Vedas (transcription of earlier original oral traditions)
600 BCE	Birth Religions (Sun) and mystification of biblical and Vedic/Puranic events (control system - prophets).
Year 0	Jesus Christ - Fictitious Formality of the " Consciousness Control System "

Table 7: *Consciential Chronology*

From this chronology and the observations made in this book, especially about the personality archetypes concerning the **Ego of human beings** and potentially of creators spiritual and otherwise, of this same personality matrix, called the Egotrix Matrix, I can conclude that the **problems of human beings** like the **problems of alien species** that have aided our development are the same and relate to specific **egoic characteristics of individuals as of individual species**.

That is, the **problem of the Universe** is 'time t'. At "**time t**" someone, consciously or unconsciously, will decide to:

- Slaying Atlantis
- Destroying Sodom and Gomorrah
- Triggering the Black Trade
- Mystifying ancient texts
- Violating freedom of expression as a function of 'technological property'
- Doing the Crusades
- Bombing Hiroshima
- Buying the Referee
- Triggering Fictitious Wars
- Getting his players doped
- Forcing your child to have 20 vaccines to enrol in school
- Simulating a terrorist attack on the Twin Towers
- Creating an Immobilising Consciousness System
- Raping someone
- Kidnapping someone
- Stopping Time
- Not taking care of one's body and mind
- Erasing people's memories
- Hurting your neighbour's pride
- To delude themselves

This will happen because, at time t, **three conditions** exist in the **Universe**:

- **Resources are infinite, in abundance** and for everyone.
- **We are prisoners of our ego.**
- **At 'time t', we are destined to confront each other.**

In this regard, from this simulation, it is plausible that by placing alongside the **Tree of Life** a Spatial-Dynamic Circle of Life (in honour of Eng Marco Todeschini) that explicit expression of Possession, Anger, Conscious Sentimental/Sexual Abuse and the creation of a

Transgenerational Bio-energetic Reserve on a systemic level can allow for **better systemic harmony in the human social context** and allow the creation of **points of union** that are also useful to be able to relate with that part of Creators/Educators who have a more complex Ego, in my opinion, such as hungry spirits and Reptilians, but master what I have defined as "**Alchemical Knowledge**", which would allow us to overcome the dogma of capitalism, have much more free time and become young again for longer.

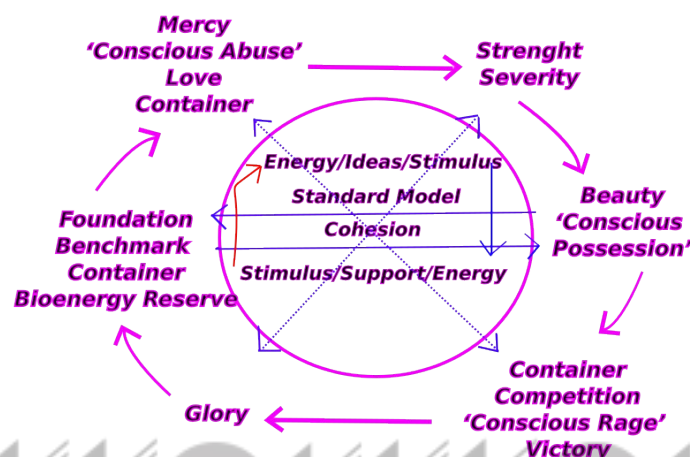

Illustration 24: The Spatial-Dynamic Realm (Life-Circle)

As mentioned in the introduction, this book **is not the truth**, but it can be a **starting point** to reflect on as well as certainly represent **theses to be refuted**.

My ignorance is not meant to offend anyone and those who wish to contact me for anything will find my **contact details in the opening pages of this book**, bearing in mind that all my communications, broadbands, emails and accounts are being tracked by those individuals who are part of the '**Serpent Group**' and people close to me will potentially be reached via the internet and their devices and bodies to be chipped and potentially 'compromised'.

In my next book, I will simply show you how the **current economic model is obsolete** and not in line with the laws of the Universe, consequently our mental model too (often plagued by financial problems and/or economic ambitions), I will share my "software" with you and show you the very famous "**Vision of the Harmony of Things**" with the hope of a more sincere, collaborative and conscious future for all.
